ACKNOWLEDGEMENTS

- To my supervisor Prof. A.K. Varma for his guidance, advice, encouragement, freedom of research and useful discussions throughout the period of this work, which I shall always remember.

- To the present Dean, School of Life Sciences, Prof. M. Habibulla and former Deans, Profs. Asis Datta, G.S. Singhal and P. Mohanty for ensuring all the facilities to carry out this work.

- To Mr. A.C. Alexander, Mr. A. Ahmed and Mr. B.A. Khan for their extreme cooperation and professional help.

- To C.S.I.R. for providing me financial assistance in carrying out this work.

- To Gajanan Hegde for the excellent job done in typing this thesis work in record time and giving all possible cooperation. Thanks are also due to Ravi Chandran and Shaju who have assisted in typing.

- To Shashi, Rajpal, Simmi and Dev Raj for their excellent assistance during the course of all my experiments.

- To my lab friends Madame Jaishree Paul, Neerajji, Shailendra Saxena, Balu, Ajay, Ravinder and Gopal, who have always supported me in every walk of life and made my stay in the laboratory very comfortable.

- To Narendra, Srinivasa Murthy, Ram Kishore, Ajam and Sabat with whom I had useful academic discussions and friendly atmosphere.

- To Maruthi, Shukla, Jha, Parveen Garg, Venu, Tarak, Atanu and Adrian for giving me all cooperation, friendly advice and a pleasant company.

- To my parents, grand parents, brothers Imman and Kittu for their love, affection and bearing with me in all circumstances.

- Last but not least, to Sridevi for everything.
