Acknowledgement

First and foremost, I express my gratitude to Dr. S. B. Nimse, Hon’ble Vice Chancellor, University of Lucknow, Lucknow who has been not only a teacher for me but a constant source of inspiration from the very early stages of my career. His support and encouragement gave me wisdom to pursue my interests. His constant vigil on my progress ensured that I am on the right track. I am also thankful to Mrs. Subhha Sarjerao Nimse for showering motherly care on me and for her kind attitude.

I still remember the day when I met Prof. K. Srinivas for the first time in his office room at the Institute of Mathematical Sciences (IMSc) couple of years ago. That was a point of inflection in my life. With him I learned the nuances of research. His professional attitude, yet friendly warmth kept my going easy. I could understand that the road to research, particularly in analytic number theory is not easy, full of risk, too demanding... I was prepared to take the challenge. Thanks to his timely help and advise every now and then. He suggested the problems and extended helping hand whenever I felt the going tough. I am proud to say that I could successfully complete the work under his professional and informal supervision. I have no words to thank him enough!

I greatly appreciate the support received through the collaboration with Prof. Stephan Baier. Prof. Ram Murty is a source of constant inspiration to all the younger and aspiring mathematicians. I had the good fortune to interact with him. I sincerely thank him. I thank Professors Michel Waldschmidt, A. Ivić, C. S. Aravinda, P. Sankaran, K. N. Raghavan, Anirban Mukhopadhyay, Sanoli Gun and Krishnan Rajkumar for encouragement.

I thank the Director and his Administrative colleagues of IMSc for supporting my visits, providing congenial environment for pursuing research and the warm hospitality extended to me time and again. In spite of the space crunch and the Chennai Floods, the administrative staff ensured that researchers and visitors do not get affected-kudos to them! The visits allowed me to attend the talks, interact with visitors, use the library. I think it has certainly added to my potential.
My parent Institution - Swami Ramanand Teerth Marathwada University (SRTM) - has always stood behind scholars interested in research and higher education. I express my gratitude to SRTM for facilitating my research in more than one way. The help and support extended by administration allowed me to freely concentrate on my research and undertake academic visit to various Institutions.

My special thanks to Dr. Pandit Vidyasagar, Hon’ble Vice Chancellor, SRTM University, for his support and encouragement.

My special thanks to Dr. Suprabha Kulkarni, Associate Professor, Pemraj Sarda College, Ahmednagar for encouraging my studies and constantly giving moral support since my undergraduate time. She has played an important role in my life as a teacher.

I am thankful to Dr. J. N. Salunke, Professor, School of Mathematical Sciences, SRTM University for all his help during my entire Ph.D. tenure. I also thank my colleagues in the School of Mathematical Sciences, SRTM University for their help and support.

I have no words to thanks my parents Mr. Keshav R. Sangale and Mrs. Manjushree K. Sangale for keeping trust on me and allowing me to pursue my studies. I thank my elder brother Mr. Navnath K. Sangale who encouraged and helped me at every stage of my personal and academic life and longed to see this achievement come true. I thank my sister Mrs. Asha Mane, her husband Mr. Shivaji Mane and my sister-in-law Mrs. Aarti Sangale for their help. I express my appreciation for the help and support extended by Mr. Madhav Hebade during this period.

Finally, my sincere thanks to all my students at SRTM whose good wishes helped me in boosting my morale. I thank every one who helped me in one way or the other to see this day come true. Thank you all for being there!
