Acknowledgements

I’d like to take this opportunity to thank Dr. Amit Chattopadhyay for his guidance during the course of this thesis. The growth of my scientific career has immensely benefited from Amit’s commitment as a mentor and scientist, the interest he took in my science, and all the time he spent teaching me about all facets of ‘the life scientific’.

I would like to thank the University Grants Commission and the Council of Scientific and Industrial Research for research fellowships. I would like to thank Dr. Lalji Singh, Director CCMB for continued financial assistance in the later stages of this thesis and Amit for making sure I get the financial assistance I needed during the last stages of my PhD.

The entire instrumentation group of CCMB provided efficient maintenance and help when needed. I am especially grateful to Prasad and Kingi for their maintenance of the PTI LS-100 NSFM with its myriad complications! I would like to thank them for all the times they answered my distress calls when the nanosecond counts would just decide to shut down during acquisition. I’d also like to thank Raghu and Soumi for their help at the NSFM. Thanks to Asha and Sanjeev, for maintaining the F4010 Hitachi Flourimeter and the CD machine. Special thanks to Dr. T. Ramakrishna Murti for discussions about the CD machine.

Giri and Nageshwar Rao have always been of help at the digital imaging facility. Figure IV.8 of this thesis has made a successful transition from the initial drawing (done by Giri) to a digital image, thanks to Giri’s continued efforts. Thanks are due to Mallesh and Prakash for all the xeroxing that they have done for me for this thesis and otherwise. I am grateful to Dr. Palnitkar at the CCMB dispensary for helping me cope with all sorts of health problems during this time.

Prof. Erwin London (SUNY, Stony Brook) generously gifted us the 10-DN used in Chapter IV of this thesis. I’d like to thank Amit for making sure it reaches Hyderabad, specially the second time.

I gratefully acknowledge Rukmini’s help in the membrane penetration depth experiments presented in Chapter IV.
I’d like to thank Amit for the efficient way he corrected this thesis. Shanti gave me very useful advice and help in the final stages of putting this thesis together.

No research is ever done by one person and co-workers always have a hand in what does or doesn’t come out of the endeavor. I’d like to thank Sattu for helping me find my feet with gramicidin in the early part of my thesis. Hari helped me set up the sucrose density gradient experiments in Chapter V of this thesis and provided advice and suggestions in my early days at CCMB. I’d like to thank Raghu and Soumi for their cooperation when it seemed like we all needed to use F4010 at the same time. I’d like to thank Raghu, Soumi, and Shanti for their spontaneous support when I needed it. I’d like to thank my labmates for careful reading of my manuscripts and criticisms and suggestions for my presentations. Raghu, Soumi, Shanti, Thomas, Jafri, Yamuna, Ajuna, Sandeep and Sourav provided a congenial lab atmosphere. I’d like to thank Sarwarji and Venkatlakshmi for their help with Nitrogen cylinders and lab maintenance. Thanks are due to Rajeshwari and Ranga Rao for their help with all official matters. Ranga Rao has helped to sort out all matters administrative from my very first day in CCMB to now.

All the times I felt I was alone, I knew I’d ‘get by with little help from my friends’. Thanks to Suchi, Sindhu and Sushma for being friends and not walking out whenever ‘I sang out of tune’. Payal and Rajika were not at CCMB but made sure I knew I had their support. Thanks to Jagreet, Prasad, Harish, Amit Adhikari, Subhashini, Maithreye and the unipunebunch for discussions and shared experiences.

I’d like to thank Ms. Rita Talwar at Modern School for giving me my first glimpse of the people behind the science. I’d like to thank her for her commitment to teaching (not so grateful kids) biology beyond the NCERT textbook. My parents and my family (extended and ever growing) have always been a source of support for my endeavors. Thanks for the honest appraisals of a shared journey and for spiritual sustenance and support during this journey and beyond.
