ACKNOWLEDGMENT

First and foremost I would like to thank my parents, to whom I am indebted for their endless support. My grand mother Late Smt. Shakuntala Rani Malhotra and my father Mr. Bharat Parkash Malhotra have devoted all of their time and energy to help me succeed in this endeavour. Without their loving support and understanding I would never have completed my research work.

I am extremely indebted to my supervisor Prof. Yogesh Singh for guiding me throughout the research work and for being like a father to me. I will always be thankful to him for his valuable time, openness, encouragement, advice, and unconditional support. I wish to thank him for being an honest individual with broad interests who provides steady support in the most difficult times. His guidance helped me in all the time of research and writing of this thesis. I want to extend my appreciation for his patience, his full devotion to others, his great understanding, and the lessons, he gave me throughout these last several years. It was apparent in his eyes the love he had for his students, and it was apparent in the students eyes their subconscious acknowledgment towards that fact. I would like to thank him for giving us a smile every morning that I am sure made the day of every research scholar. I could not have imagined having a better advisor and mentor for my Ph.D study. Sir, Thank you for being you.
A few lines are too short to make a complete account of my deep appreciation for my supervisor Dr. Arvinder Kaur. Her constructive criticism and valuable advice helped me greatly at all stages. I believe that one of the main gains of this research work was working with her and gaining her trust and confidence. In addition, she was always accessible and willing to help me with my research. As a result, research life became smooth and rewarding for me. The thesis became distinctly easier to finish with her friendly helpfulness and confidence in my ability to carry this research work. Her company and assurance at all the time would be remembered lifelong.

I am thankful to Prof. B.V.R Reddy, Dean, University School of Information Technology for his encouragement, help and cooperation throughout the work.

I express my gratitude and thanks to Dr. C. S. Rai, Dr. Praveen Chandra for their kind help and cooperation throughout the Ph.D work. I would like to thank University School of Information Technology, Guru Gobind Singh Indraprastha University for giving me Doctoral Research Fellowship in order to complete my research work.

Finally, I would like to thank all my friends and office staff for their direct and indirect help and support in this work.

Ruchika Malhotra
