Contents

1 Introduction ........................................ 1
   1.1 Introduction .................................... 1
   1.2 Organization of Thesis ......................... 2
   1.3 Existing System and Proposed Solution ........ 4
       1.3.1 Existing System .......................... 4
       1.3.2 Existing Solutions ....................... 5
       1.3.3 Proposed Solution ....................... 6
   1.4 Electricity Reforms - Indian Government Initiative .. 6
   1.5 Literature Survey ................................ 8
   1.6 Objectives of the Work ......................... 24
   1.7 Conclusion ...................................... 24

2 Energy Conservation - Necessity, Present and Future ...... 25
   2.1 Introduction .................................... 25
   2.2 Global Energy Production & Consumption .......... 26
   2.3 Indian Energy Potential, Production and Consumption .. 29
   2.4 Impact of Energy Consumption on Ecology .......... 29
2.5 Lighting ................................................................. 32
  2.5.1 Lamps, Performance and Economics ...................... 33
  2.5.2 Side effects of CFL lamps ................................. 35
  2.5.3 LED technology ............................................. 35
2.6 Delta to Star Conversion of Drives ............................. 37
2.7 Energy Efficient Motors ....................................... 39
2.8 Conclusion ......................................................... 43

3 Energy Audit & Management ..................................... 44
  3.1 Introduction .................................................... 44
  3.2 Demand Side Management ..................................... 46
  3.3 Need for Energy Management & Audit ....................... 47
    3.3.1 Energy Management ...................................... 47
    3.3.2 Electrical Energy Audit ................................ 48
  3.4 Energy Audit Procedure ...................................... 51
    3.4.1 Preliminary Energy Audit (PEA) ......................... 51
    3.4.2 Detailed Energy Audit (DEA) ........................... 52
    3.4.3 Methodology ............................................ 53
  3.5 Checklist for Energy Audit .................................. 55
    3.5.1 A Typical List of Items for Energy Audit ............ 56
    3.5.2 Suggested Instrumentation .............................. 58
    3.5.3 Data Analysis ........................................... 58
    3.5.4 Computation of Payback Period ......................... 61

7 Renewable Energy Sources .................................. 140
   7.1 Introduction ........................................... 140
       7.1.1 Green energy ...................................... 140
       7.1.2 Advantages ........................................ 141
       7.1.3 Disadvantages ...................................... 142
       7.1.4 Renewable Energy in India Facts & Figures ....... 142
       7.1.5 Potential for Renewable Energy Generation in India . 143
   7.2 Non Conventional Power Generation Trends and Technologies 144
       7.2.1 Wind Power ......................................... 144
       7.2.2 Solar Photovoltaic Energy ............................ 147
       7.2.3 Solar Thermal Energy ................................ 149
       7.2.4 Small Hydro Power Generation ...................... 152
List of Figures

2.1 Typical performance comparison of EEM with standard motor  . 41

3.1 Energy audit methodology  . .......................... 56
3.2 Energy consumption vs production  . .......................... 60
3.3 Specific energy consumption vs production  . .......................... 61

4.1 Payback period breakup for various energy efficient motors  . 90

5.1 Development of micro irrigation  The world scenario  . 108
5.2 Drip Irrigation in India  . .......................... 109

6.1 Typical Room with Sunlight  . .......................... 121
6.2 Example for Bit Interpretation  . .......................... 134
6.3 Circuit diagram of proposed smart home controller  . .......................... 139

7.1 The schematic diagram of the proposed intelligent device to handle renewable sources  . .......................... 161
7.2 Savings in lower income domestic houses  . .......................... 165
7.3 Savings in middle income domestic houses  . .......................... 165
7.4 Savings in higher income domestic houses  . .......................... 165
List of Tables

2.1 The Global Energy production .................................. 27
2.2 World Energy Consumption .................................... 27
2.3 Top Five Energy Producing Countries (measured in BTU) .... 28
2.4 The top five energy consuming countries (measured in BTU) . 28
2.5 Energy supply Indicators in India as on 2001 ............... 29
2.6 Sector-wise energy consumption by fuel(%) in India 1999/2000 . 30
2.7 Limits of poisonous emission values in parts per million ..... 31
2.8 Carbon Emission values in various countries .................. 31
2.9 NO\textsubscript{2} Levels in some Asia pacific cities .............. 31
2.10 SO\textsubscript{2} Levels in select Asian and Pacific Cities ......... 32
2.11 Total Suspended Particles ................................. 32
2.12 Comparison of various types of lamps ........................ 34
2.13 Future of LED technology ................................... 38
2.14 Trends in LED brightness .................................... 38
2.15 2-Pole M/C -Efficiencies at different loadings .............. 42
2.16 4-Pole M/C -Efficiencies at different loadings .......... 42
