ACKNOWLEDGEMENTS

Successful completion of a task by an individual is due to the fact that he has been blessed by the Almighty and fortunate to be with the individuals who can show the right path. During my journey from objective to goal, I have experienced shower of blessings, guidance and inspiration from my teachers, parents, friends, all my well wishers and Almighty who gave me strength and made it to achieve the goal. At the end of my journey of research, I would like to thank all those who contributed in many ways to the success of this study by giving their valuable time and expertise, thus helped me to get this thesis to fulfillment. Although it is not possible for me to name and thank them all individually, but it is great pleasure for me to pen down some of the special personalities who have made it possible for me to put this research work in present form.

Language is the most persuasive vehicle of human expression, yet on occasions, one finds it difficult to get appropriate words to express feelings aptly. The same perplexity haunts inside me in penning down my sagacious sense of utmost gratitude and admiration for my magnanimous and intellectual guide Dr Rakesh Yadav (Associate Professor at Department of Pharmacy) for his exceptionally versatile guidance, pliant suggestions, constructive criticism and encouragement throughout the course of present investigation, without which it would not have been possible to consummate this herculean task to a smooth end. I strongly appreciate the freedom and the confidence he granted me throughout the execution of this work. I warmly thank him for his unflinching courage and conviction that always inspired me.

I express my sincere thanks to Prof. Aditya Sashtri (Vice Chancellor, Banasthali University) for providing necessary research facilities. Thanks are also due to Prof. S.K. Paliwal (HOD, Department of Pharmacy) for providing congealing environment and necessary facility to accomplish my research work.

I gratefully acknowledge UGC, New Delhi for providing the financial assistance to undertaking this research work. I owe special thanks to SAIF, PU, Chandigarh for providing $^1$H- and $^{13}$C-NMR data of my compounds. I am also thankful to Lala Lajpat Rai University of Veterinary and Animal Sciences, Hisar (Haryana) for providing animals.
I am highly thankful to Mr. Vinod Sharma, for providing IR spectra and elemental analysis data. I would also like to thank all the teaching and non teaching staff of Pharmacy Department.

I am indebted to all my labmates for providing a stimulating and fun filled environment. It would never have been possible to complete this study without an untiring support from scholars of the research lab. I am thankful to Sneha, Pooja, Seema, Amrita, Neetika, and Monika Chauhan for their immense help in providing exact knowledge in my problems. I am also thankful to all my seniors and my juniors who always guided and helped me. I owe my sincerest thanks to Suman Sharma, her father, grandmother and her sister too for their support, love and kindness.

Special thanks to Monika Maan for working with me in wee hours of crisis, curtailing my fragmentation and enhancing my survival during the darkest times. Her giggle about things other than just our papers, over a cup of tea is highly appreciable. She always stood up beside up at each and every pit fall. She always encouraged me to look forward with more dedication. Her husband Sunil Jakhar too had always guided me.

It is my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to my parents (Jatinder Gumber and Poonam Gumber) and in-laws (RK Bhandari and Urmil Bhandari) for their support, understanding and generous care. The blessings of my family have always leaded me towards achieving my work. They had been my constant support always. They all stood by me whenever I felt let down, pepped me up when my spirit dampened. They were always beside me during the happy and hard moments to push me and motivate me. This work would not have been accomplished without the unconditional support of my husband, Dhawal Bhandari who stood by my side during the crucial stage of my research journey. His love and support is something which I can’t pay back. Special thanks to my brother-Himanshu, brother-in-law Manik and Sister-in-law, friend and supporter Dr. Purnima Bhandari. Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project. Finally, it is imperative to point out that all may not be mentioned, none are forgotten.
