ACKNOWLEDGMENTS

With deep sense of gratitude, I would like to thank Professor B. Padmanabhamurty for his keen interest, constant encouragement, help and valuable suggestions towards the successful completion of this work.

I am thankful to the Council of Scientific and Industrial Research (CSIR), India for providing financial support for my Ph.D. studies.

Part of my Ph.D. research is carried out at the Atmospheric Turbulence and Diffusion Division, U.S.A. I would like to express my sincere gratitude to the Indo-American Subcommission on Education and Culture, and the Government of India for extending me financial support under the Indo-American Fellowship (Fulbright) Program to the Atmospheric Turbulence and Diffusion Division (ATDD) of the National Oceanic and Atmospheric Administration (NOAA), Oak Ridge, Tennessee, USA, for providing the opportunity for research, computer, and library facilities during my visit from November 1988 to October 1989. In this context I wish to acknowledge the kind assistance of the Education Department of the Ministry of Humanresource Development, India, Ms. Lydia Z. Gomes of Council for International Exchange of Scholars (CIES), Washington, D.C., Mr. Bruce B. Hicks, Director, ATDD, and Dr. Rayford P. Hosker, Jr., Assistant Director, ATDD, for arranging my visit to NOAA, Oak Ridge.

I am indebted to Dr. K. Shankar Rao, Senior Physical Scientist at ATDD, for making available research reports, data, and models from the U.S. Dept. of Energy's Atmospheric Studies in Complex Terrain (ASCOT) and other programs. His keen interest and patient
guidance of research, and kind assistance during my stay in Oak Ridge are gratefully acknowledged. I am also very thankful to Dr. Rayford P. Hosker, Jr., Field Director of ASCOT, for his valuable suggestions and comments on my thesis and related works, and for arranging to NOAA's Wave Propagation Laboratory, BAO tower in Boulder, and Colorado State University. There are too many others who were kind and very helpful during my visit to ATDD to be mentioned here, and I extend my sincere appreciation and many thanks to all of these good friends and colleagues; among them Dr. R. M. Eckman and Mr. J. A. Herwehe need a special mention.

I thank the Environmental Engg. Branch of NTPC, New Delhi and Bose Ghose Associates for providing emission, air quality and surface meteorological data from Singrauli thermal power plants area. I am grateful to my friends and colleagues Mr. I.N.Rao, Dr. Vikas Kumar, and Mr. Sambi Reddy for their timely help.

I have all my appreciations to my labmates Pramod, Joshi, Debasish, Umesh, Ravichandran and Jyotirani for not disturbing me any time during my Ph.D. thesis work.

I am thankful to the Dean, School of Environmental Sciences, for providing research facilities for this work.

I am grateful to my parents for their moral support and constant encouragement.

RAMA SESHU TANGIRALA
