ACKNOWLEDGEMENT

All praise be to Almighty Allah, Lord of all that exists, most gracious most merciful. It is by His grace that the present work has been accomplished.

It gives me a great pleasure to thank all those who have inspired me for undergoing the Ph.D. programme. First and foremost with reverence and profound gratitude, I acknowledge the guidance and help so often sought and so generously given to me by my respected teacher and supervisor Professor Nisar Ahmad Rather, H.O.D, Department of Mathematics, University of Kashmir, Srinagar, who not only encouraged me to take up this subject for my doctoral degree, but also painstakingly supervised my work and acted as a perpetual source of inspiration and encouragement, despite his heavy responsibilities. It is because of his esteemed inspiration, sympathetic encouragement, noble guidance, valuable suggestions, affectionate attitude and stimulating criticism with which my work stands as complete now.

I also would like to thank Dr. B. A. Zargar for the considerable time, thought and energy which he used in order to further my progress in the work of this thesis.

I express my indebtedness to all the teachers of the Department of Mathematics for encouragement and inspiration which I received from them during the entire course of my work.

I must admit the consistent help rendered to me by the members of the non-teaching staff of the Department of Mathematics during the whole period of the said programme.

I also wish to express my sense of gratitude to my research colleagues, who not only extended their cooperation whenever I needed, but also shared my joy and sorrow during this period.

I offer most sincere gratitude to the Council of Scientific and Industrial Research (CSIR), Government of India, for financial support in the form of Junior and Senior Research Fellowships.

Lastly, I express my indebtedness to and appreciation for my family members, particularly my mother, who have given abundantly of their support, guidance and love throughout my entire life.

Suhail Gulzar Mattoo
