ACKNOWLEDGEMENT

At the very first place, I would like to dedicate this work To Him…Who gave to my life first eternal breath, who protected me from harm and guided me to the righteous path.

This thesis would not have been possible without the help of so many people in so many ways. There are a number of people without whom this thesis might not have been written, and to whom I am greatly indebted. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

In the first place and foremost, I pay my heartiest gratitude to Prof. Aditya Shastri, Vice Chancellor, Banasthali Vidyapith. He has given me the opportunity for doing research in this institution. It is really a great pleasure for me. I sincerely acknowledge my deepest sense of gratitude to Prof. Chitra Purohit, President, Banasthali Vidyapith.

I would like to record my gratitude to my supervisor Dr. Seema Verma for her supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the work. I have been under her able guidance when she encouraged me to start this work and gave me the opportunity to be a member of her inspiring research group. Above all and the most needed, she provided me unflinching encouragement and support in various ways. During these years I have known her as a sympathetic and principle-centered person. Her overly enthusiasm and
integral view on research and her mission for providing “only high-quality work and not less”, has made a deep impression on me. I owe her lots of gratitude for having shown me this way of research. Her endless support, patience and constructive criticism have been precious during these years. I shall always remain deeply indebted for her ingenious guidance, affectionate glances and generosity bestowed on me, which assisted me to overcome every problem that came in my way during the period of this investigation and preparation of this manuscript. I would also like to thank her for keeping an eye continuously on the progress of my work and was always available even during personal vacations and providing valuable guidance and comments on this work. She could not even realize how much I have learned from her. I am indebted to her more than she knows. I gratefully acknowledge Dr. A. S. Mandal and Scientist, IC Design Group, CEERI-Pilani for encouraging me to do the research in this field.

Where would I be without my family? My parents deserve special mention for their inseparable support and prayers. I am forever indebted to my parents for their effort to give me the best possible education. They taught me the value of knowledge, the joy of love and the importance of family. They have stood behind me in everything I have done, providing constant support, continuous encouragement and true love. My Father, Mr. Rajendra Kumar Sharma in the first place is the person who put the fundament my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother, Mrs. Santosh Sharma, is the one who has been a source of encouragement and inspiration to me throughout my life. A special thanks to her for
providing a “writing space” and for nurturing me through the months of writing. I would like to thank my father-in-law Mr. Yogesh Sharma and my mother-in-law Mrs. Sujata Sharma for their continuous encouragement.

Furthermore, I convey my acknowledgement to my husband Shubham Sharma. A very special thanks to him for his practical and emotional support. I would like to give a big thanks to my brother Saket Sharma, my bhabhi Noopur Sharma, my brother-in-law Utsav Sharma for their friendly advice and continuous encouragement, support and blessings during this research work.

I would also like to acknowledge my little daughter Anvi for her unselfish love and to give me encouragement in indirect way. Finally, I would like to thank everybody who has been important to the successful realization of thesis, as well as expressing my apology that I could not mention everyone personally one by one.

(MEGHA SHARMA)
