</table>
3.7.1 Estimations of net return

3.7.2 Estimations of available lands

3.7.3 Estimations of Capital

3.7.4 Estimations of available Labour in different months

3.7.5 Estimations of maximum number of livestock activities

3.7.6 Estimation of use of labour (Month wise)

3.8 Development of L.P.Model

3.9 L.P. Plan-I and its optimum solution.

3.9.1 Interpretation of the optimum solution

3.10 L.P. Plan-II and its optimum solution.

3.10.1 Interpretation of the optimum solution.

3.11 Farm income in the Existing unplanned situation.

4. Optimum plans for Marginal farmers using Fractional programming model for maximizing Land Profitability.

4.1 Introduction

4.2 Computer Programme for the solution of Linear fractional programming problem (LFPP)

4.3 maximization of Land Profitability.

4.3.1 F.P. Plan – I and its optimum solution.

4.4 Interpretation of the Optimum solution.
4.5 F.P. Plan – II
4.6 Interpretation of the Optimum solutions.
4.7 Comparative study of FP Plan – I with F.P. Plan – II

5. Optimum plans for marginal farmers using fractional programming model for maximizing capital Profitability.
5.1 Introduction.
5.2 F.P. Plan – III and its optimum solution.
5.3 Interpretation of the optimum solution.
5.4 F.P. Plan – IV and its optimum solution.
5.5 Interpretation of the optimum solution.
5.6 Comparative study of F.P. Plan – III and F.P. Plan – IV.

6. Optimum plans for marginal farmers using fractional programming model for maximizing labour profitability.
6.1 Maximization of labour profitability.
6.3 Interpretation of the optimum solution.
6.4 F.P. Plan – VI and its optimum solution.
6.5 Interpretation of the optimum solution.
6.6 Comparative study of F.P. Plan – V and F.P. Plan – VI.
7. **Optimum plan for Marginal farmers using Goal Programming.**

7.1 Goal Programming.  

7.2 Goal Programming formulation.  

7.3 Interpretation of the optimum solution.  

7.4 Summary Result of Goal Programming Plan.  

**BIBLIOGRAPHY**
