4.1 General

4.2 Preparation of slope map

4.3 Slope analysis

4.4 Land use and land cover - cropping pattern

4.4.1 Use of land use/land cover map

4.4.2 Land use/land cover

4.4.3 Land use/land cover classification systems

4.4.4 Methodology

4.4.5 Study area land use/land cover classification system

4.4.6 Study area land use/land cover description

4.4.6.1 Built-up-land

4.4.6.2 Agricultural land

4.4.6.2.1 Kharif crop land

4.4.6.2.2 Rabi crop land

4.4.6.2.3 Double cropped area

4.4.6.2.4 Plantations

4.4.6.2.5 Fallow land

4.4.6.3 Forest land

4.4.6.4 Barren rocky area

4.4.6.5 Steep sloping areas

4.4.6.6 Waste lands

4.4.6.6.1 Land with or without scrub

4.4.6.6.2 Barren rocky/stony waste/sheet rock area

4.4.6.6.3 Gullied ravinous land

4.4.6.7 Water bodies

4.4.6.7.1 River/stream

4.4.6.7.2 Tanks
CHAPTER V SOIL MAPPING

5.1 Introduction
5.2 Soil climate
5.3 Methodology
  5.3.1 Preliminary visual interpretation
  5.3.2 Ground truth collection
  5.3.3 Post field interpretation
  5.3.4 Area estimation
5.4 Generation of derivative information
  5.4.1 Land capability classification
  5.4.2 Land irrigability classification
    5.4.2.1 Quality and quantity of water
    5.4.2.2 Drainage requirements
    5.4.2.3 Other economic considerations
5.5 Land evaluation for crop suitabilities
5.6 Physiography and soils
5.7 General description of soils
5.8 Interpretative grouping
  5.8.1 Land capability grouping
  5.8.2 Land irrigability grouping
5.9 Land suitability for individual crops
  5.9.1 Land evaluation for crops
5.10 Conclusions

CHAPTER VI GEOMORPHOMETRIC ANALYSIS

6.1 General
6.2 Classification of morphostructural genesis
6.3 Methodology
6.4 Geomorphology
  6.4.1 Geomorphic units identified in the study
    6.5.1 Valley fill
6.5.2 Alluvial fan/piedmont zone
6.5.3 Moderately weathered pediplain of Cumbum shales and phyllites
6.5.4 Shallow weathered/buried pediplain of Cumbum shales and phyllites
6.5.5 Shallow weathered pediplain of Cumbum shales and phyllites
6.5.6 Linear ridge of Cumbum quartzites
6.5.7 Pediment of Cumbum quartzites
6.5.8 Linear ridge of Bairenkonda quartzites
6.5.9 Structural hills of Bairenkonda quartzites

6.6 Drainage basin analysis

6.7 Drainage basin/catchment

6.8 Linear aspects of the drainage basin
   6.8.1 Drainage network pattern/stream pattern
   6.8.2 Stream order
   6.8.3 Bifurcation ratio
   6.8.4 Stream length
   6.8.5 Length ratio

6.9 Areal aspects of drainage basins
   6.9.1 Basin area
   6.9.2 Basin shape factor
   6.9.3 Form factor
   6.9.4 Circularity ratio
   6.9.5 Elongation ratio
   6.9.6 Texture ratio
   6.9.7 Drainage density
   6.9.8 Stream frequency

6.10 Relief aspects of the drainage basin
   6.10.1 Relief of the basin
   6.10.2 Constant of channel maintenance
   6.10.3 Length of overland flow
CHAPTER VII  HYDROGEOLOGICAL STATUS

7.1 Introduction
7.2 Geological nature of the area/aquifer characteristics
   7.2.1 Shallow aquifers
   7.2.2 Deeper aquifers
7.3 Data collection
7.4 Lithological logs
7.5 Electrical resistivity studies
7.6 Well census
7.7 Waterlevel fluctuation
   7.7.1 Long term water level trends
   7.7.2 Yield analysis of bore wells
7.8 Ground water resource estimation
   7.8.1 Ground water development perspective
7.9 Hydrochemistry

CHAPTER VIII  THEMATIC LAYER INTEGRATION AND ACTION PLAN GENERATION

8.0 General
8.1 Integration of land and water resource units
   8.1.1 Step 1
      8.1.1.1 Geology
      8.1.1.2 Geomorphology
      8.1.1.3 Slope
      8.1.1.4 Soil
      8.1.1.5 Land use/land cover
      8.1.1.6 Rainfall
      8.1.1.7 Ground water potential
   8.1.2 Step 2
8.1.3 Step 3

8.2 Recommended optimal land use and farming systems

8.2.1 Existing agricultural scenario

8.3 Suggested drought proofing works

8.3.1 Rain water harvesting structures

8.3.1.1 Check dams

8.3.1.2 Mini percolation tanks

8.3.2 Soil and moisture conservation

8.3.2.1 Vegetative barriers, contour bunding

8.3.2.2 Broadbed and furrow method of cultivation

8.3.2.3 Irrigation water management

8.3.3 Fodder/fuel wood/forest development

8.3.3.1 Fodder/fuel wood/silviculture/social forestry

8.3.3.2 Afforestation

8.3.3.3 Shelterbelt/strip plantation

8.3.4 Shelter belt/strip plantation along all the roads/railway tracks

8.4 Soil and water conservation measures for non-agricultural lands

8.4.1 Contour trenching

8.4.2 Gully control structures

8.4.3 Revegetation

8.4.4 Quarrying

8.4.5 Afforestation

8.4.6 Silviculture

8.4.7 Social forestry

8.4.8 Moisture conservation

8.5 Soil and water conservation measures for agricultural lands

CHAPTER IX
SOCIO-ECONOMIC IMPACT ANALYSIS AND WATERSHED PRIORITISATION

9.2 Objectives of socio-economic impact analysis
9.3 Methodology

9.4 Demographic features/socio economic data analysis
   9.4.1 Work participation
   9.4.2 Infrastructure
   9.4.3 Land holdings
   9.4.4 Irrigation
   9.4.5 Infrastructure

9.5 Integrated prioritisation
   9.5.1 Socio economic ranking
   9.5.2 Illustration of socio-economic parameters

9.6 Data analysis

9.7 Data integration

9.8 Development strategy
LIST OF FIGURES

Chapter No.

1.1 Model watershed I
1.2 Location map
1.3 Base map
1.4 Transportation network
1.5 Study area image
3.1 Rainfall distribution map III
4.1 Slope map IV
4.2 Land use/land cover map
4.3 (Field Photos) Open scrub land in the background/groundnut field in the foreground
4.4 Open scrub land in the background/kharif un-irrigated in the foreground
4.5 Wastelands with gullies and severe soil erosion
4.6 Cumbum tank spread with silted foreshore
5.1 Ombothermic graph V
5.2 Soil map
5.2a Soil legend
5.3 (Field Photos) Cumbum tank
5.4 Shallow skeletal soils on piedmont
5.5 Steep slopes with very shallow soils underlain by rock
5.6 Eroded and salt affected valley
6.1 Geomorphology map VI
6.2 Geology map
6.3 Ground water potential map
6.4 Drainage/watershed map
6.5 Drainage/sub-sheds division map
6.6f Drainage pattern and texture of six sub-sheds
6.7 Straining ordering of streams
6.8a to 6.8f

(Graphs) log. no. of streams vs order.

Order vs mean log stream length

Cum. length vs order

Six sub-sheds

7.1 Hydrograph - Turumella well

7.2 Hydrograph - Cumbum well

8.1 Action plan map

8.1a Action plan map legend

8.2 Water resources management action plan

9.1a Revenue villagewise boundary map - Ardhaveedu

9.1b Revenue villagewise boundary map - Bestavaripet

9.1c Revenue villagewise boundary map - Cumbum

9.2a Proportion of scheduled casts percent - Ardhaveedu

9.2b Proportion of scheduled casts percent - Bestavaripet

9.2c Proportion of scheduled casts percent - Cumbum

9.3a Proportion of scheduled tribe percent - Ardhaveedu

9.3b Proportion of scheduled tribe percent - Bestavaripet

9.3c Proportion of scheduled tribe percent - Cumbum

9.4 (Graphs) Percent distribution of population by activity - Ardhaveedu + Bestavaripet

9.5 Percent distribution of population by activity - Cumbum

9.6 Mandalwise population + literacy

9.7 Mandalwise SC, ST population distribution

9.8a Drainage overlay on revenue village boundary map - Ardhaveedu

9.8b Drainage overlay on revenue village boundary map - Bestavaripet

9.8c Drainage overlay on revenue village boundary map - Cumbum
