ABSTRACT iii  
CHAPTER  
1 Introduction 1-9  
1.1 Overview 1  
1.2 Objective of the Work 2  
1.3 Outline of the Thesis 9  
2 Literature review 10-17  
3 Principles of Scatter search 18-38  
3.1 Introduction 18  
3.2 Genetic algorithms 18  
3.3 Simulated annealing 20  
3.4 Scatter search 23  
3.4.1 Basic structure 26  
3.4.2 Advanced Scatter search designs 30  
3.4.3 Applications 36  
3.4.4 Local search techniques 37  
4 Optimization of manufacturing tolerances 39-69  
4.1 Definitions 39  
4.1.1 Design and Manufacturing tolerances 39  
4.1.2 Functional dimension/Assembly dimension 40  
4.1.3 Assembly response function 40  
4.1.4 Stack-up conditions 40
5.4.4 Subset generation method
5.4.5 Solution combination method
5.5 Case study – 2
5.5.1 Discussions on Results
6 Determination of optimal machining parameters
6.1 Introduction
6.2 Multi-tool drilling
  6.2.1 Objective function
  6.2.2 Constraints
  6.2.3 Input data
  6.2.4 Discussion on Results
6.3 Multi-pass face-milling
  6.3.1 Objective function
  6.3.2 Constraints
  6.3.3 Input data
  6.3.4 Discussion on Results
6.4 Multi-pass turning
  6.4.1 Objective function
  6.4.2 Constraints
  6.4.3 Input data
  6.4.4 Discussion on Results
6.5 Surface grinding
  6.5.1 Objective functions
  6.5.2 Constraints
  6.5.3 Resultant objective function
  6.5.4 Input data
  6.5.5 Discussion on Results
7 Optimal allocation of index positions on tool magazines 123-134

7.1 Introduction 123
7.2 Methodology 125
7.3 Case study 127
  7.3.1 Discussion on Results 132

8 Conclusions 135-137

Bibliography 138

Appendix 1 – Program for Scatter search
Appendix 2 – Copies of Acceptance letters of the papers
Appendix 3 – Published paper
