

LIST OF TABLES

Table No.	Description	Page No.
2.1	A list of hydrazones employed in the spectrophotometric determination of Lead (II), Cadmium (II), Vanadium(V) and Copper (II)	05-09
2.2	A Review on Spectrophotometric determination of Cadmium (II) with different organic reagents.	09-11
2.3	A Review on Spectrophotometric estimation of Lead (II) with different organic reagents	12-13
2.4	A Review on Spectrophotometric estimation of Vanadium (V) with different organic reagents	14-15
2.5	A review on spectrophotometric estimation of Copper (II) with different organic reagents	15-16
5.1.1	IR spectral bands (cm^{-1}) of DMAHBH	44
5.1.2	$^1\text{H-NMR}$ spectral data of DMAHBH	45
5.1.3	IR spectral bands (cm^{-1}) of DMHBIH	47
5.1.4	$^1\text{H-NMR}$ spectral data of DMHBIH	48
5.2.1	Effect of DMAHBH on Cd (II)-DMAHBH complex	51
5.2.2	Effect of time on stability of Cd (II)- DMAHBH Complex	51
5.2.3	Effect of TritonX-100 on Cd (II)-DMAHBH Complex	52
5.2.4	Tolerance limit of foreign ions in the determination of Cadmium(II)	53
5.2.5	Estimation of Cd(II) in soil samples	54
5.2.6	Estimation of Cd(II) in Cigarette samples	54
5.2.7	Tolerance limit of foreign ions in the determination of 0.8430 $\mu\text{g/ml}$ of Cadmium(II)	59
5.2.8	Estimation of Cd(II) in soil sample	60
5.2.9	Estimation of Cd(II) in Cigarette sample	60
5.2.10	Analytical Parameters of Cd (II)-DMAHBH system	61
5.3.1	Effect of Reagent	63

5.3.2	Effect of Triton X-100 on the absorbance of Pb(II)-DMAHBH system	64
5.3.3	Time effect	64
5.3.4	Tolerance limit of foreign ions in the determination of 1.554µg/ml of Lead(II)	66
5.3.5	Estimation of Lead (II) in BulkedFood & soil sample	67
5.3.6	Estimation of Lead(II) in Biological samples, Soil & Vehicle Exhaust	67
5.3.7	Tolerance limit of foreign ions in the determination of 1.554 µg/ml of Lead(II)	72-73
5.3.8	Estimation of Pb(II) in food and soil samples	73
5.3.9	Estimation of Lead (II) in Biological samples, Soil & Vehicle Exhaust	74
5.3.10	Analytical Parameters of Pb (II)-DMAHBH system	74
5.4.1	Effect of DMAHBH on the absorbance of metal complex	76
5.4.2	Time effect on stability of V (V)-DMAHBH Complex	77
5.4.3	Effect of Triton X-100 on the absorbance of V(V)-DMAHBH complex	77
5.4.4	Tolerance limit of foreign ions in the determination of 0.408 µg/ml of Vanadium(V)	79
5.4.5	Estimation of V(V) in water and plant material samples	80
5.4.6	Estimation of V(V) in alloy samples	80
5.4.7	Tolerance limit of foreign ions in the determination of 0.408 µg/ml of Vanadium(V)	84-85
5.4.8	Estimation of V (V) in water and plant material samples	85
5.4.9	Estimation of V (V) in alloy samples	85
5.4.10	Analytical Parameters of V (V)- DMAHBH system	86
5.5.1	Effect of DMAHBH on Cu (II) –DMAHBH Complex	88

5.5.2	Effect of time on stability of Cu (II)-DMAHBH Complex	89
5.5.3	Tolerance limit of foreign ions in the determination of 1.554µg/ml of Copper (II)	90
5.5.4	Estimation of Copper (II) in Food samples	91
5.5.5	Tolerance limit of foreign ions in the determination of 1.554 µg/ml of Copper(II) by First and Second Order derivative Spectrophotometric method.	96
5.5.6	Estimation of Copper(II) in Food samples	97
5.5.7	Estimation of Copper (II) in biological samples	97
5.5.8	Analytical Parameters of Copper (II)-DMAHBH system	97
5.6.1	Study of DMHBIH on the absorbance of Cd(II)- DMHBIH complex	99
5.6.2	Effect of Time on stability of Cd (II)- DMHBIH System	100
5.6.3	Effect of CTAB on the absorbance of Cd(II)-DMHBIH system	100
5.6.4	Tolerance limit of foreign ions in the estimation of 0.562 µg/ml of Cd(II)	101-102
5.6.5	Estimation of Cd(II) in synthetic alloy samples	102
5.6.6	Estimation of Cd(II) in radish flesh and cabbage samples	103
5.6.7	Estimation of Cd(II) in Cigarette samples	103
5.6.8	Tolerance limit of foreign ions in the estimation Of 0.562µg/ml of Cd(II)	107-108
5.6.9	Estimation of Cd(II) in synthetic alloy samples	108
5.6.10	Determination of Cadmium (II) in radish flesh and cabbage samples	108
5.6.11	Estimation of Cd(II) in Cigarette samples	109
5.6.12	Analytical Parameters of Cd(II)- DMHBIH system	109

5.7.1	Study of DMHBIH on the absorbance of Metal Complex (Lead)	111
5.7.2	Effect of Triton X-100 on the absorbance of Lead (II) – DMHBIH complex	111-112
5.7.3	Time effect on stability of Complex	112
5.7.4	Tolerance limit of foreign ions in the estimation of 5.18 µg/ml of Pb(II)	114
5.7.5	Estimation of Pb(II) in Bulked Food and Soil Sample	115
5.7.6	Estimation of Lead(II) in Biological sample, Soil & Vehicle Exhaust	115
5.7.7	Tolerance limit of foreign ions in the estimation of 5.18 µg/ml Pb(II)	119-120
5.7.8	Estimation of Pb(II) in Bulked Food and Soil Sample	120
5.7.9	Estimation of Lead(II) in Biological sample, Soil & Vehicle Exhaust	121
5.7.10	Analytical Parameters of Pb (II)- DMHBIH system	121

LIST OF FIGURES

Figure No.	Description	Page No.
5.1.1	IR spectrum of Diacetylmonoxime-3-amino-4-hydroxybenzoyl hydrazone (DMAHBH)	45
5.1.2	NMR Spectra of Diacetylmonoxime-3-amino-4-hydroxybenzoyl hydrazone (DMAHBH)	46
5.1.3	Mass Spectrum of Diacetylmonoxime-3-amino-4-hydroxybenzoylhydrazone (DMAHBH)	46
5.1.4	Infrared spectrum of 3,5-dimethoxy-4-hydroxybenzaldehyde isonicotinoylhydrazone (DMHBIH)	47
5.1.5	¹ H-NMR spectrum of 3, 5-dimethoxy-4-hydroxybenzaldehyde isonicotinoylhydrazone (DMHBIH)	48
5.1.6	Mass spectrum of 3, 5-dimethoxy-4-hydroxy Benzaldehydeisonicotinoylhydrazone (DMHBIH)	49
5.1.7	Structure of DMAHBH	49
5.1.8	Structure of DMHBIH	49
5.2.1	Absorption spectra of Cd (II) - DMAHBH Complex	50
5.2.2	Study of pH on the absorbance [Cd(II)-DMAHBH] system	50
5.2.3	Absorbance vs Amount of Cd(II) µg/ml	53
5.2.4	Job's curve of [Cd(II)- DMAHBH] complex	55
5.2.5	Molar ratio plot of [Cd(II)- DMAHBH] complex	55
5.2.6	First derivative spectrum of [Cd(II)- DMAHBH] vs reagent	56
5.2.7	Second derivative spectrum of [Cd(II)- DMAHBH] vs reagent	56
5.2.8	First derivative spectra of [Cd (II)-DMAHBH] vs. reagent	57
5.2.9	Second derivative spectra of [Cd (II)-DMAHBH] vs. reagent	57
5.2.10	First derivative amplitude vs Amount of Cd(II) µg/ml	58
5.2.11	Second derivative amplitude vs Amount of Cd(II) µg/ml	58
5.3.1	Spectrum of Lead (II) complex and reagent.	62

5.3.2	pH Effect	63
5.3.3	Absorbance vs Amount of Pb(II) $\mu\text{g/ml}$	65
5.3.4	Job's curve of [Pb (II)-DMAHBH] complex	68
5.3.5	Molar ratio plot of [Pb(II)-DMAHBH] complex	68
5.3.6	First derivative spectrum of [Pb(II)-DMAHBH] vs reagent	69
5.3.7	Second derivative spectrum of [Pb(II)-DMAHBH] vs reagent	70
5.3.8	First derivative spectra of [Pb (II)-DMAHBH] vs. reagent	70
5.3.9	Second derivative spectra of [Pb (II)-DMAHBH] vs. reagent	71
5.3.10	First derivative amplitude vs Amount of Pb(II) $\mu\text{g/ml}$	71
5.3.11	Second derivative amplitude vs Amount of Pb(II) $\mu\text{g/ml}$	72
5.4.1	Absorption Spectrum of V (V)- DMAHBH Complex	75
5.4.2	Effect of pH on the absorbance [V(V)-DMAHBH] system	76
5.4.3	Absorbance vs Amount of V(V)	78
5.4.4	Job's curve of [V(V)-DMAHBH] complex	80
5.4.5	Molar ratio plot of [V(V)-DMAHBH] complex	81
5.4.6	First derivative spectrum of [V(V)-DMAHBH] vs reagent	81
5.4.7	Second derivative spectrum of [V(V)-DMAHBH] vs reagent	82
5.4.8	First derivative spectra of [V (V)-DMAHBH] vs. reagent	82
5.4.9	Second derivative spectra of [V (V)-DMAHBH] vs. reagent	83
5.4.10	First derivative amplitude vs Amount of V(V)	83
5.4.11	Second derivative amplitude Vs Amount of V(V)	84
5.5.1	Absorption spectra of Cu (II)-DMAHBH Complex	87
5.5.2	Study of p^{H} on the absorbance of Cu (II)-DMAHBH system	88
5.5.3	Absorbance vs Amount of Cu(II) $\mu\text{g/ml}$	90
5.5.4	Job's curve of [Cu(II)-DMAHBH] complex	91
5.5.5	Molar ratio plot of [Cu(II)-DMAHBH] complex	92
5.5.6	First derivative spectrum of [Cu(II)-DMAHBH] vs reagent	93
5.5.7	Second derivative spectrum of [Cu(II)-DMAHBH] vs. reagent	93
5.5.8	First derivative spectra of [Cu(II)-DMAHBH] vs reagent	94
5.5.9	Second derivative spectrum of [Cu(II)-DMAHBH] vs. reagent	94
5.5.10	First derivative amplitude vs Amount of Cu (II) $\mu\text{g/ml}$	95

5.5.11	Second derivative amplitude vs Amount of Cu (II) $\mu\text{g/ml}$	95
5.6.1	Absorption maxima of Cd (II)- DMHBIH Complex	98
5.6.2	Study of pH on the absorbance [Cd(II)-DMHBIH] complex	99
5.6.3	Absorbance vsAmount of Cd(II) $\mu\text{g/ml}$	101
5.6.4	Job's curve of [Cd(II)-DMHBIH] complex	103
5.6.5	Molar ratio plot of [Cd(II) -DMHBIH] complex	104
5.6.6	First derivative spectrum of [Cd(II)-DMHBIH] vs reagent	104
5.6.7	Second derivative spectrum of [Cd(II) -DMHBIH] vs reagent	105
5.6.8	First derivative spectra of [Cd(II)-DMHBIH] vs reagent	105
5.6.9	Second derivative spectra of [Cd(II) -DMHBIH] vs reagent	106
5.6.10	First derivative amplitude vs Amount of Cd(II)	106
5.6.11	Second derivative amplitude Vs Amount of Cd (II)	107
5.7.1	Absorption Maxima of Pb (II)- DMHBIH System	110
5.7.2	Effect of p^{H} on absorbance of Pb (II) –DMHBIH Complex	111
5.7.3	Linearity Plot of Pb (II) –DMHBIH Complex	113
5.7.4	Job's curve of [Pb(II)-DMHBIH] complex	115
5.7.5	Molar ratio plot of [Pb(II)-DMHBIH] complex	116
5.7.6	First derivative spectrum of [Pb(II)-DMHBIH] vs reagent	116
5.7.7	Second derivative spectrum of [Pb(II)-DMHBIH] vs reagent	117
5.7.8	First derivative spectra of [Pb(II)-DMHBIH] vs reagent	117
5.7.9	Second derivative spectraof [Pb(II)-DMHBIH] vs reagent	118
5.7.10	First derivative amplitude vs Amount of Pb(II)	118
5.7.11	Second derivative amplitude Vs Amount of Pb(II)	119
