# LIST OF TABLES

## CHAPTER 1 INTRODUCTION

| Table 1.1 | Potential biotechnological uses of bacteriorhodopsin | 4 |

## CHAPTER 2 REVIEW OF LITERATURE

| Table 2.1 | Larsen’s four division of microbes based on NaCl requirement | 10 |
| Table 2.2 | Kushner’s five division of microbes based on NaCl requirement | 11 |
| Table 2.3 | Genes that contribute to MLSA | 13 |
| Table 2.4 | Glycolipid composition of few Halobacterial genera | 15 |
| Table 2.5 | Halocin characteristics | 38 |

## CHAPTER 3 MATERIALS AND METHODS

| Table.3.1 | Primers used for amplification of 16S rDNA of Halobacteria | 45 |
| Table.3.2 | Octadiscs Antibiotics and concentration | 51 |

## CHAPTER 4 RESULTS

| Table 4.1 | Ionic composition of the saltpan sample used to isolate halocin producing strain | 80 |
| Table 4.2 | Characteristics of strains BTSH10 and BTSH03 | 83 |
Table 4.3  Taxonomic hierarchy of *Natrinema* sp. BTSH10
Table 4.4  Taxonomic hierarchy of *Halorubrum* sp. BTSH03
Table 4.5  Lipids present in the cell wall of *Natrinema* sp. BTSH10
Table 4.6  Fatty acid content of *Natrinema* sp. BTSH10
Table 4.7  ICP-AES analysis of the salt crystal formed by *Natrinema* sp. BTSH10
Table 4.8  Concentration of different aminoacid content of halocin SH10 and its properties
Table 4.9  *In vitro* short term toxicity studies of halocin SH10 against DLA cells
Table 4.10  Effect of halocin SH10 on antitumor parameters of DLA bearing mice

**APPENDIX**

Table 4.11  Antibiotic sensitivity and resistance profile of *Natrinema* sp. BTSH10 and *Halorubrum* sp. BTSH03
LIST OF FIGURES

CHAPTER 1 INTRODUCTION

CHAPTER 2 REVIEW OF LITERATURE

Figure 2.1 Twofold serial dilution method for halocin assay

CHAPTER 3 MATERIALS AND METHODS

CHAPTER 4 RESULTS

Fig 4.1 Preliminary screening on Zobell’s agar medium (15% NaCl)

Fig. 4.2 Photomicrograph showing Scanning Electron Microscopy (SEM) of single cells of Natrinema sp. BTSH10

Fig. 4.3 Photomicrograph showing Scanning Electron Microscopy (SEM) of single cells of Halorubrum sp. BTSH03

Fig. 4.4 Growth curve of haloarchaeon Natrinema sp.BTSH10

Fig. 4.5 Growth curve of haloarchaeon Halorubrum sp.BTSH03

Fig. 4.6 The PCR amplicon of 16S rRNA gene

Fig. 4.7 The partial 16S rRNA gene sequence obtained for Natrinema sp. BTSH10

Fig. 4.8 NCBI Gen bank file data of Natrinema sp.BTSH10 with the allotted accession number
| Fig. 4.9 | The partial 16S rRNA gene sequence obtained for *Halorubrum* sp.BTSH03 |
| Fig. 4.10 | NCBI Gen bank file data of *Halorubrum* sp.BTSH03 with the allotted accession number |
| Fig. 4.11 | Phylogram of *Natrinema* sp. BTSH10 showing evolutionary relationships of 16 taxa (linearized) |
| Fig. 4.12 | Phylogram of *Halorubrum* sp. BTSH03 showing evolutionary relationships of 20 taxa (linearized) |
| Fig. 4.13 | Thin layer chromatography of cell wall lipids on silica gel |
| Fig. 4.14 | GC-MS separation of the lipids isolated from *Natrinema* sp.BTSH10 |
| Fig. 4.15 | Fatty acid profile of *Natrinema* sp.BTSH10 obtained after FAME analysis |
| Fig. 4.16 | Salt crystals formed in Haloarchaea growth medium |
| Fig. 4.17 | Scanning Electron Microscope images of the crystal |
| Fig. 4.18 | The powder X-ray diffraction spectrum of the crystal formed by *Natrinema* sp.BTSH10 |
| Fig. 4.19 | FTIR spectrum of the crystal formed by *Natrinema* sp.BTSH10 |
| Fig. 4.20 | UV –vis- NIR spectrum of the crystal formed by *Natrinema* sp. BTSH10 |
| Fig. 4.21 | TGA-DTA analysis of the crystal formed by *Natrinema* sp.BTSH10 |
| Fig. 4.22 | Effect of different incubation temperatures on halocin production |
| Fig. 4.23 | Effect of different pH on halocin production by *Natrinema* sp. |
| Fig 4.24 | Effect of different concentrations of NaCl on halocin |
production by *Natrinema* sp. BTSH10

Fig. 4.25 Effect of different carbon sources on halocin production by *Natrinema* sp. BTSH10

Fig. 4.26 Effect of different nitrogen sources on halocin production by *Natrinema* sp. BTSH10

Fig. 4.27 Effect of different inorganic salts on halocin production by *Natrinema* sp. BTSH10

Fig. 4.28 Effect of different agitation rates on halocin production by *Natrinema* sp. BTSH10

Fig. 4.29 Time course experiment on halocin production by *Natrinema* sp. BTSH10

Fig. 4.30 Gel filtration chromatography elution profile of halocin that showed halocin activity
