ACKNOWLEDGEMENTS

I always considered it trite and over-fulsome of thesis authors to list a full set of people who were 'invaluable'; always, that is, until I wrote a thesis and realized just how deeply I am in debt to the people listed below.

It is not out of adherence to convention that I first acknowledge my research Supervisor, Prof. Y. Anjaneyulu, Director, IST, JNT University, Hyderabad. Quite simply, if not for him, my academic career would have finished with my post graduate degree, thus making it possible for me to realize my research hopes and dreams. I am deeply grateful to my professor's steadfast encouragement and generous financial support and all the enormous freedom he has given to pursue my own interests while at the same time providing just the right amount of guidance to ensure that my efforts contribute to the mainstream of Environmental research these many years.
