ACKNOWLEDGEMENT

I am, first of all, deeply grateful to my esteemed supervisor, Prof. Utsa Patnaik, Center For Economic Studies and Planning, School of Social Sciences, Jawaharlal Nehru University, for her invaluable guidance and suggestions throughout my research work. Without her support, it would not have been possible for me to see the final form of my thesis. Her knowledgeable suggestions and penetrating criticism helped a great deal in the evolution of this work.

I express my sincere thanks to Prof. Prabhat Patnaik, Center For Economic Studies and Planning, School of Social Sciences, for his invaluable suggestions and comments on the chapter dealing with Myanmar economy.

I like to acknowledge the ICCR (Indian Council for Cultural Relations), Government of India, for financial support for my PhD research work. I thank my government Union of Myanmar, Ministry of Education and the Institute of Economics, for granting me the permission to pursue Ph. D. degree in India.

My special thank are also to Myanmar families who are working in World Health Organization and Myanmar Embassy for taking care of me and giving me moral support. In particular, I am grateful to Dr. Than Sein (Director (EIP), SEARO, World Health Organization, New Delhi) and his wife, Daw Thida for their support and care of me like my parents during my stay in India.

I owe special debt and respect to my parent who deliberately wanted me to be a PhD degree holder. Their constant encouragement cannot be acknowledged in formal words.

With respects,

CHO CHO THEIN
