ACKNOWLEDGEMENTS

I would like to place on record my deepest gratitude to Prof. Anuradha M. Chenoy for having helped me traverse my first journey in the domain of research. She shared much of the excitement, which characterises any such preliminary attempt and also assuaged any of my doubts about the subject of inquiry. My gratitude also extends to the faculty at my Centre who have been a source of constant encouragement.

Much of the study also owes a great deal to my friends, who have all through been most supportive. Special mention must be made here of Garu, Siddhu, Sunny, Murari, Prabhat, Poonam, Kailash, Vijayji and several others whose names do not appear here due to limitations of space have also contributed significantly in sustaining my efforts.

A special token of my gratitude goes to my parents and family members who have substantially provided me with immense love and affection that saw me through these years.

I have relied on the libraries at JNU, Teen Murti, IDSA, Russian Science and Culture, American Centre and the British Council to consolidate my research sources.

Thanks are also due to UGC for granting me the Research Fellowship to complete my first serious academic pursuit. Ultimately, I consider myself particularly fortunate to have benefited from an extremely conducive academic environment at JNU. This shall make me cherish my stay at the University for a very long time to come.

At the end of it, I would like to bear full responsibility for any errors in this study.
