LIST OF TABLES

Table 1.1. Clinical disease patterns of different *Leishmania* complexes

Table 3.1. Screening of antimicrobial peptides for antileishmanial activity.

Table 3.2. Equilibration of intracellular pH upon peptide treatment of *Leishmania* promastigotes.

Table 3.3. Collapse of membrane potential upon peptide treatment of *Leishmania* promastigotes

Table 3.4. Therapeutic efficacy of peptides against *Leishmania*.

Table 5.1. Cytoplasmic Vacuolation induced by the peptides in *Leishmania*.

Table 5.2A. Effect of EBSS incubation on the membrane potential of *Leishmania* promastigotes.

Table 5.2B. Effect of EBSS incubation on the intracellular pH of *Leishmania* promastigotes.

Table 5.3. Effect of peptides and AMPB (at LD50) on the viability of *Leishmania* amastigotes.

Table 5.4A. Effect of IL on the intracellular pH homeostasis in *Leishmania* amastigotes.

Table 5.4B. Effect of IL on the membrane potential of *Leishmania* amastigotes.
