ACKNOWLEDGEMENT

I would like to thank with deep appreciation and gratitude to my esteemed supervisor, Prof. K. G. Saxena for profusely encouraging and inspiring me to undertake this work. He not only diligently supervised this work but also honed my skills as researcher and encouraged me in exemplary fashion. Working with him was a pleasant experience more so because he allowed a remarkable degree of freedom and flexibility of thoughts and expressions. His critical inputs and vast and deep knowledge of the key methodological issues was of great assistance in the construction and formulation of my arguments, interpretation of data, and in the building up a sound framework of my study. His incredible patience and exemplary endurance to go through drafts is appreciated most. I shall forever remain indebted to him for all the support and encouragement that he rendered throughout my research work. He shall always remain a source of strength and inspiration for me forever.

I also take this opportunity to thank my co-supervisor, Dr. K. S. Rao (Senior Scientist & Head, SDRE, G.B. Pant Institute of Himalayan Environment and Development) for the keen interest that he took in my work and for the various significant and constructive views, particularly those related to the fieldwork.

I sincerely thank Prof. P. S. Ramakrishnan for his moral support and constant encouragement to me during the course of my research work. I also benefited by his knowledge on ecological issues in general that enabled me to arrive at a better understanding of these complex theoretical issues.

My sincere thanks to Dr. G. S. Rawat (Wild Life Institute of India, Dehradun), for helping me out with the taxonomic identification of plant species.

I am thankful to present Dean Prof. Kasturi Dutta and also former Deans, Prof. V. Rajamani, Prof. J. Subba Rao and Prof. D. K. Banerjee for providing the necessary facilities and support.

I am thankful to Dr. K. K. Sen for patiently guiding me techniques of Lab analysis. My special thanks are due to Dr. R. L. Semwad.

I would like to thank Mr. B. D. Sharma for readily assisting me, with his knowledge and highly professional skills related to lab instrumentation. Puran, Dinesh, Dayal and Vikram were also of great help and I am indebted to them for their selfless act of assistance.

I wish to thank inhabitants of Demul Village and Dokpas who made my field stay comfortable and enjoyable. My special thanks are due to Nono Sahab, Late Guruji, Chunduji and Devta. Mr. Dorje Angchuk and Gatuk, my field assistants are fondly remembered for their sheer physical assistance as well as for the invaluable help rendered in sample and data collection.

I am extremely grateful to my uncle Mr. P. C. Bodh for constantly encouraging and supporting me at the most crucial stages of my life and always inspiring me to work hard and sincerely. Our discussions about my work in Spiti and his immense knowledge helped me a lot.
My special thanks are due to Pramod Kumar, Dr. Vivek Kumar, Sricharan Behera, Kaushik and Gajanan for helping me at the most critical phase of my work.

Acknowledging my seniors, friends and well wishers are of great pleasure. I appreciate the help, sustained encouragement, and inspiration provided by my friend and labmate K. Chandrashekhar. I also thank my seniors Dr. Madan Koirala, Dr. Bhaskar Sinha, Dr. Abdul Wakeel and Dr. Kritika Singh for their constant support and encouragement. My thanks are also due to Abhay, Sudesh, Aniruddha, Shekhar Mallick for constantly inspiring me to complete my work.

The Senior Research Fellowship granted to me by JNU-UGC is greatly acknowledged. Without this financial support, I could never have been able to complete my research.

Lastly, my heartfelt gratitude and thanks are due to my family members, my parents, brother and my beloved wife Angroop Dolma for constantly encouraging, supporting and inspiring me through critical junctures.
