Acknowledgements

First and foremost I would like to thank and remember the god almighty who gave me the strength and kept me inspired enough to do the persistent work in the direction of completion of my Ph.D. He was always there in my times of hardships and showed me the way out. The completion of my academic work is inconceivable without the expert guidance of my mentor and guide Prof. N.K. Shukla. He always understood my difficulties and extended his full support. He was patient enough to my never ending queries. My mentor’s indispensable tutelage and wise counsel at every step of my work enabled me to complete the work without any obstruction. Despite various academic and official assignments, he spared his precious time in discussing even in minute details of this work.

I would also like to thank Head of the Department, Electronics and Communication, Prof. Nar Singh for his full support and cooperation. He is truly inspirational for all the students. All the teachers of the department are always very encouraging and their advices are very valuable. I would like to thank my lab mates, for all the enlightening discussions and encouraging words after the manuscript rejections. My sincere thanks to my alma mater University of Allahabad where I worked for my Ph.D. Last but not the least I am very thankful to my parents, my sisters and my husband who were always there by my side. Their constant encouragement and inspirational words took me this far.
