Gratitude

Expressing gratitude for the enormous support and cooperation I received over the past few years is no easy task. Nevertheless, it would give me great pleasure to thank here, some of the people whose contributions I cherish when I look down memory lane.

Dr RP Roy, my supervisor, has been the guiding force behind this thesis. Apart from his professional attitude towards work and his warm approachable personality, both of which in themselves are estimable one aspect of him, which is very remarkable, is his phenomenal patience. His calm, reflective manner has steered me through many troubled times. I would like to express my sincere gratitude and appreciation to him, for his expert guidance and mentorship and for his encouragement and support at all levels.

I am deeply indebted to Prof. Sandip K Basu for giving me the opportunity to work in a premier institute like NII and for ensuring the unimpeded progress of our scientific endeavors. I also thank my Doctoral Committee members, Dr Dinkar Sahal, Dr Vishwakarma, Dr Debasis Mohanty, Dr Rajesh Gokhale for their constructive suggestions during the progression of my thesis work.

My heartfelt gratitude also goes out for the help rendered by the administrative and support staff of NII, the proverbial “wheels” of the NII wagon. As a special mention, I would like to recall the support provided by Mr. Akhilesh Aggarwal and Mr. Rajkamal, Mr. Panday and Mr. Madan.

My lab mates, both past and present, Kumaran, Sivaram, Sudha, Dev, Lavanya and now Srijita, Amit, Pramod, and Rakeshji, have been instrumental in making my sojourn in NII a memorable period of my life. One of the singular features of our lab, over the years, has been its warm atmosphere of camaraderie and companionship. Work has never been tedious for these five years and the friendly banter of my lab mates has many-a-times dispelled the blues that sometimes accompany the rougher patches of life. This section would
indeed be incomplete without the mention of Sanghamitra, who is as much a part of our lab as any of us. I shall really miss the fun we have all had together at work and otherwise.

I also feel very fortunate indeed for having had the opportunity to befriend some very nice people who have gone a long way in making NII, for me, "a home away from home." Vicky, Raju, Rads, Gagan, Sangeeta, Jyoti, Parashu, Alli, Manish, Samy, Nitin, Archana, Beena, Kondal, Vanitha, Hemchand and Hoshang, I shall cherish the memories of times spent with you guys. Ayub and Rahul, special thanks to you for lending me a patient ear whenever I needed it. Shreeni and Ganesh dha, you will always hold a special place in my heart for all the good times and discussions we have had together.

My profound gratitude goes out to my family – my parents and sister, for their unconditional love and support and for being a constant source of guidance and inspiration to me through thick and thin. Indeed it would be fair to say that without their encouragement this thesis might not have been possible. This thesis gratitude would be incomplete if I do not mention my sincere thanks to all my teachers of yester-years who have been instrumental in shaping me for my chosen career.
