

CONTENTS

Chapter I

Introduction

1.1	Metal-monocarboxylates	5
1.2	Metal-dicarboxylates	8
1.3	Metal-polycarboxylates	18
1.4	Applications of Coordination polymers and MOFs.....	22
1.4.1	Porous materials.....	23
1.4.2	Conductivity	24
1.4.3	Luminescence	25
1.4.4	Magnetism	26
1.4.5	Sensor capability.....	27
1.4.6	Catalysis.....	28
1.4.7	Chirality	29
1.5	Scope and Objectives.....	29

Chapter II

Reagents and Physico-chemical Methods

2.1	Reagents.....	35
2.2	Preparative details.....	35
2.3	Physical measurements	36
2.3.1	Spectral methods.....	36
2.3.2	Elemental analysis	42
2.3.3	Thermal Analysis.....	42
2.3.4	Powder X-ray diffraction.....	45
2.3.5	Single crystal X-ray diffraction	45
2.3.6	Magnetic susceptibility measurements	46
2.3.7	Coordination chemistry of Co(II), Ni(II), Cu(II), Zn(II) and Cd(II) systems	47

Chapter III

Amine templated Co(II) *bis*-phthalate based coordination polymers with anionic skeletal frameworks - synthesis, characterization and functional properties

3.1	Introduction.....	61
3.2	Experimental.....	63

3.3	Results and Discussion	66
3.3.1	FTIR spectra	67
3.3.2	Electronic spectra.....	70
3.3.3	Crystal structure studies.....	72
3.3.4	PXRD studies.....	82
3.3.5	Thermogravimetric studies	83
3.3.6	Reversible structural, optical and magnetic tuning in Co(II) <i>bis</i> -phthalate coordination polymers induced by H ₂ O molecules	85
3.3.7	Magnetic properties at room temperature.....	89
3.3.8	Low temperature magnetic studies	89
3.4	Conclusion	91

Chapter IV

Amine templated Cu(II) *bis*-phthalate based coordination polymers with anionic skeletal frameworks - synthesis, characterization and functional properties

4.1	Introduction.....	95
4.2	Experimental.....	96
4.3	Results and Discussion	98
4.3.1	FTIR spectra	99
4.3.2	Electronic spectra.....	101
4.3.3	EPR spectra.....	102
4.3.4	Crystal structure studies.....	104
4.3.5	Thermogravimetric studies	110
4.3.6	PXRD studies.....	112
4.3.7	Magnetic properties at room temperature.....	113
4.3.8	Low temperature magnetic studies	113
4.4	Conclusion	114

Chapter V

Amine templated Ni(II) *bis*-phthalate based coordination polymers with anionic skeletal frameworks - synthesis, characterization and functional properties

5.1	Introduction.....	117
5.2	Experimental.....	118
5.3	Results and Discussion	120

5.3.1	FTIR spectra	121
5.3.2	Electronic spectra.....	122
5.3.3	Crystal structure studies.....	124
5.3.4	PXRD studies.....	129
5.3.5	Thermogravimetric studies	129
5.3.6	Magnetic properties at room temperature.....	131
5.3.7	Low temperature magnetic studies	131
5.4	Conclusion	132

Chapter VI

Synthesis, characterization and photoluminescence properties of one- and two- dimensional coordination polymers of amine templated Zn(II) *bis*-phthalates

6.1	Introduction.....	137
6.2	Experimental.....	138
6.3	Results and Discussion	140
6.3.1	FTIR spectra	141
6.3.2	Crystal structure studies.....	143
6.3.3	PXRD studies	147
6.3.4	Thermogravimetric studies	148
6.3.5	Band gap measurement and semi conductive behaviour....	150
6.3.6	Photoluminescence studies	153
6.4	Conclusion	155

Chapter VII

Synthesis, characterization and photoluminescence properties of one- and two- dimensional coordination polymers of amine templated Cd(II) *bis*-phthalates

7.1	Introduction.....	159
7.2	Experimental.....	160
7.3	Results and Discussion	163
7.3.1	FTIR spectra	164
7.3.2	Crystal structure studies.....	166
7.3.3	PXRD studies	172
7.3.4	Thermogravimetric studies	173
7.3.5	Photoluminescence studies	175
7.4	Conclusion	177

Chapter VIII

Amine templated one-, two- and three- dimensional coordination polymers of Ni(II) and Cu(II) with 1,2,4,5-benzenetetracarboxylates- synthesis, characterization and functional properties

8.1	Introduction.....	181
8.2	Experimental	183
8.3	Results and Discussion	186
8.3.1	FTIR spectra	187
8.3.2	Electronic spectra.....	190
8.3.3	EPR spectra.....	192
8.3.4	Crystal structure studies.....	194
8.3.5	PXRD studies.....	208
8.3.6	Thermogravimetric studies	209
8.3.7	Low temperature magnetic studies	211
8.4	Conclusion	214

Chapter IX

Amine templated three- dimensional MOFs of Zn(II), Cd(II) and Co(II) with 1,2,4,5-benzene tetracarboxylates -synthesis, characterization and functional properties

9.1	Introduction.....	219
9.2	Experimental.....	220
9.3	Results and Discussion	223
9.3.1	FTIR spectra	224
9.3.2	Electronic spectra.....	226
9.3.3	Crystal structure studies.....	227
9.3.4	PXRD studies.....	238
9.3.5	Thermogravimetric studies	238
9.3.6	Photoluminescence studies	241
9.4	Conclusion	243

Chapter X

Summary and Conclusion	245
