ACKNOWLEDGEMENT

All praise be to Almighty Allah, Lord of all that exists, most gracious and most merciful. It is by His grace that the present work has been accomplished.

It is my proud privilege to express my abiding sense of obligation to my worthy supervisor Dr. M. A. Khanday, Sr. Assistant Professor, Department of Mathematics, University of Kashmir, Srinagar, whose able guidance and unstinted encouragement was instrumental in the completion of this thesis. Thank you for giving me the opportunity to develop this experience and challenging me everyday to make me a better person. Without his kind supervision, this work would have been mere a dream. His enthusiasm in research and optimistic attitude positively effects my study and life. He will be my example in personality, intelligence and career.

I deem it a great pleasure to express my heartfelt gratitude and profound respect to my research co-supervisor Professor Bashir Ahmad Ganai, Centre of Research and Development, University of Kashmir, Srinagar for his advice, encouragement and supervision.

I am highly thankful to all teaching faculty and non teaching staff of the department for their continuous and selfless support during my Ph.D. tenure. Also, I find no words to acknowledge my colleagues viz. Dr. Aasma Rafiq, Mr. Fida Hussain, for their caring attitude and spending precious time in utile discussions required to smoothly complete this task. They have also been a constant source of encouragement. It is a great pleasure to thank them for being a great company and all the fun we have had in the last few years.
At a more personal level, I assert that my family had been my greatest source of strength. A deep sense of gratitude overcomes me when I think of my parents, who had to endure a long period of my absence, during this journey. I cant express my feeling of thankfulness and appreciation for my mother in words, whose unconditional love has been my greatest strength. I once again thank my family for making my life easier during my busy schedules.
Finally my thanks to all those who have helped me directly or indirectly for making this journey enriching and memorable!

Khalid Nazir
