ACKNOWLEDGEMENTS

This thesis is the accomplishment my journey towards my Ph.D. I was not alone in this journey. Writing this thesis has been fascinating and extremely rewarding. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my mentors, family, well wishers, friends, colleagues, my students and various institutions. I would like to thank all those people who made this journey and the thesis possible and an unforgettable experience for me.

At this moment of conquest, first of all I pay homage to my first guide, Late. Dr. S. R. Kajale. He was a driving force in registering me for PhD and this work would not have been possible without his guidance, support and encouragement. Under his guidance I successfully conquered many difficulties and learned a lot. I can’t forget his hard times. Despite of his hectic schedules and ill health, he used to review my progress, give his valuable suggestions and made corrections. His unwavering courage and conviction will always inspire me, and I hope to continue to work with his noble thoughts. I wish his soul roots in peace and solace in the heaven. I can only say a proper thanks to him through my future work. I dedicate this work to him.

It’s my fortune to gratefully acknowledge the support of some special individuals. Words fail to express my gratefulness and appreciation to Dr. P. K. Mishra for his critical involvement in the initial phase of my works that categorically decided, set and channelized the task. He was always beside me during the happy and hard moments to push me and motivate me. I am thankful for his generosity and encouragement.

I express my deep sense of gratitude to my guide Dr. M. R. Nandgaonkar for his enthused supervision, firm support, encouragement and invaluable suggestions throughout the development of this research. This thesis could not have attained its present form without his active interest and inspiration. I am very much thankful to him for picking me up as a student at the critical stage of my Ph. D after the sad demise of Dr. S. R. Kajale on February 7, 2012. I warmly thank Dr. M. R. Nandgaonkar, for his valuable advice, constructive criticism and his extensive discussions around my research work.
I owe sincere and earnest thankfulness to Dr. A. D. Sahasrabudhe, Director COEP Pune, who with his vision created an urge amongst the faculty to acquire doctoral degree. He is a source of inspiration and instrumental in completion of the research. I take this opportunity to sincerely acknowledge Research Monitoring Committee, Dr. B. N. Chaudhari, Dr. M. J. Rathod, Dr. G. V. Parishwad, Dr. D. W. Pande and Dr. S. N. Sapali for their helpful suggestions and comments during my progress report presentations. Deliberations during progress presentations made this research goal oriented and resulted into a successful completion.

The road to my PhD started with a visit to Nashik Thermal Power Station (NTPS), Nashik. I was introduced to the problem by my friend Mr. A. R. Joshi, then Assistant Engineer at NTPS. I take this opportunity to say heartfelt thanks to him and the team of NTPS with special mention to CGM, Mr. Nagesh Pande, then EEMIS, Manager Boiler Maintenance and their team for allowing me to critically see the power station, understand the operation, maintenance and providing me required plant data, Boiler Tube Failure Data, repairs data etc. Their help supported me to perform my work comfortably and correctly.

I gratefully acknowledge Prof V. K. Haribhakta for his understanding, encouragement and personal attention. He never missed any progress seminar that I presented. He noted down each word of discussions that I had with expert committee and handed over it to me. These suggestions with due cognizance in the research and thesis writing have provided good and smooth basis for my Ph.D.

It’s my pleasure to acknowledge Dr. V. M. Domkundwar for constant moral support. My thanks are due to, Dr S. S. Pardeshi, Prof. P. J. Selmokar, Dr. M. P. Khond, Prof. S. S. Bhavikatti, Dr. S. B. Patil, Prof. S. V. Wagh, Dr. N. K. Chougule, Dr. S. D. Suryawanshi, Dr. C. M. Sewatkar for their valuable suggestions and constant support and encouragement. I am indebted to my many colleagues for providing a stimulating and fun filled environment. I am thankful to Mr. P. S. Thombre, Mr. Ganesh Pawar, Ms. Yogita Kolte, Students’ section staff for their support and inspiration.

It’s my fortune to gratefully acknowledge my many students. Some of them deserve special mention here for their constant support, motivation and help in the completion and compilation of the work. My thanks with due appreciation go in particular to Abhishek Deshmukh who spend his precious times with me after his working hours and even on holidays that added a value to this research. I convey
special acknowledgements to Aditya Deshmukh, Swaroop Thakur, Dipesh Vaidya, Deendayal Yadav, Mahesh Zodge, Prasad Shivdas, Harshad Salve, Santosh Pansare, Pratik Chimne, Nirmal Toshniwal, Kushal Khandare and Vinod Dangnali with whom I had many rounds of discussions as and when required on my project and they helped me a lot. I am ever indebted to all of them and admire their distinguished cooperative nature. All my friends showed a great companionship all the time. They deserve special thanks.

This thesis is the result of sacrifice of my family. Thank you doesn’t seem sufficient but it is said with appreciation and respect to my wife Prachi, for her love, care, support and creating a pleasant atmosphere for me during the inevitable ups and downs of conducting my research. I am much indebted to my sons Medhavi and Aditya for the sacrifice of their needs and wants during the phase of my research. Their support, encouragement, care, understanding and precious friendship helped me a lot in facing all odds and getting the task accomplished. I doubt that I will ever be able to convey my appreciation fully, but I owe my family my eternal gratitude.

Last but not least, I would like to pay high regards to my parents Aai and Nana, my ‘Atya’. The value system that they inculcated in me was the driving force and a catalyst in the entire process. I owe everything to them. My brothers, sisters, uncles, nephews, nieces and each and every family member were the source of sincere encouragement and inspiration throughout my research work and lifting me uphill this phase of life.

I also must acknowledge my gratitude to the Almighty. He got the accomplishment done and the goal achieved. He was with me during this endeavor that made these opportunities fruitful.

Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project. Words are short to express my deep sense of gratitude towards all such friends and well wishers.
