Table-4.4.13: Assistance given by Teachers/ Anganwadi workers in indoor and outdoor play activities.

Table -4.4.14: Showing the adequacy of Pre-School/Centre’s campus for free Child’s play.

Table-4.5.1: Showing Children can “greet teachers and friends” more by the end of the Pre-School session.

Table-4.5.2: Showing Children can say sorry when committed a mistake more by the end of the Pre-School session.

Table-4.5.3: Showing Children can say please when asking for something more by the end of the Pre-School session.
**Table-4.5.4:** Showing Children can say thank you at the right time more by the end of the Pre-School session.

**Table-4.5.5:** Showing Children can smile more openly by the end of the Pre-School session.

**Table-4.5.6:** Showing Children can shake hands more willingly by the end of the Pre-School session.

**Table-4.5.7:** Showing if Children shares toys more willingly by the end of the Pre-School session.

**Table-4.5.8:** Showing children continue playing alone or stops by the end of the Pre-School session.

**Table-4.5.9:** Showing children continue playing only with fixed friend or stops by the end of the Pre-School session.

**Table-4.5.10:** Showing children continue playing with anyone in the class till the end of the Pre-School session.

**Table-4.5.11:** Showing children play more with the whole group by the end of the Pre-School session.

**Table-4.5.12:** Showing children respect the possessions and rights of others more by the end of the Pre-School session.

**Table-4.5.13:** Showing if children talks more politely with people by the end of the Pre-School session.

**Table-4.5.14:** Showing children are more calm and in control over their emotions by the end of the Pre-School session.

**Table-4.5.15:** Showing children are more sympathetic to others by the end of the Pre-School session.

**Table-4.5.16:** Showing children learn to stand in queue more by the end of the Pre-School session.
Table-4.5.17: Showing children are friendlier with everyone by the end of the Pre-School session.

Table-4.5.18: Showing children are participating more in group games and activities by the end of the Pre-School session.

Table-4.5.19: Showing children are leading the group more willingly by the end of the Pre-School session.

Table-4.5.20: Showing children are communicating more freely by the end of the Pre-School session.

Table-4.5.21: Showing children are taking more initiative by the end of the Pre-School session.

Table-4.5.22: Showing children are more responsible in their work by the end of the Pre-School session.

Table-4.5.23: Showing the frequency of Children laughing with friends.

Table-4.5.24: Showing the frequency of Children hugging friends and teachers.

Table-4.5.25: Showing the frequency of Children singing together happily.

Table-4.5.26: Showing the frequency of Children dancing together gladly.

Table-4.5.27: Showing the frequency of Children expressing love and liking to friends

Table-4.5.28: Showing the child’s disapproval of Teacher giving attention to other children.

Table-4.5.29: Showing the children attacking another physically on whom Teacher’s attention was given to show disapproval.

Table-4.5.30: Showing if children demand the same attention for themselves as was given to others by their teacher.
**Table-4.5.31:** Showing how Pre-School program has benefitted the students according to Teachers.

**Table-4.5.32:** Showing if children cry on arrival to school at the beginning of the year.

**Table-4.5.33:** Showing if children’s demand for attention reduces by the end of Pre-School session.

**Table-4.5.34:** Showing if children’s demand or wanting to sit on the lap or close to her Teacher reduces by the end of Pre-School session.

**Table-4.5.35:** Showing children’s display of temper tantrum in the class.

**Table-4.5.36:** Showing children’s display of thumb sucking habit in the class.

**Table-4.5.37:** Showing children’s display of nail biting habit in the class.

**Table-4.5.38:** Showing children spitting at people as a show of Socio-emotional immaturity.

**Table-4.5.39:** Showing children say “No” to everything showing Socio-emotional immaturity.

**Table-4.5.40:** Showing children make face at others when angry showing Socio-emotional immaturity.

**Table-4.5.41:** Showing children cry when scared showing Socio-emotional immaturity

**Table-4.5.42:** Showing children fight with others.

**Table-4.5.43:** Showing children withdraw or isolate from teachers and friends showing Socio-emotional immaturity.

**Table-4.5.44:** Showing if children followed the instructions of teachers.

**Table-4.5.45:** Showing children urinate at inappropriate place and time.
Table 4.5.46: Showing being active affects the concentration of Children.

Table 4.5.47: Showing and comparing the percentages of General Pre-School children who complain of others taking their belongings between the 1st and 2nd half of the year.

Table 4.5.48: Showing and comparing the percentages of Ukhrul ICDS Anganwadi children who complain of others taking their belongings between the 1st and 2nd half of the year.

Table 4.5.49: Showing Children’s affection about each other

Table 4.5.50: Showing Children’s communication with Teacher

Table 4.5.51: Showing Children’s relationship with each other

Table 4.5.52: Showing Teacher-Pupil relationship in the school

Table 4.5.53: Showing Children peaceable with one another

Table 4.5.54: Showing whether children are calm and in control

Table 4.5.55: Showing Children’s state of happiness

Table 4.5.56: Showing Children’s attention in the class

Table 4.5.57: Showing Children’s isolation from friends

Table 4.5.58: Showing Children’s cry on arrival at school

Table 4.5.59: Showing Children’s urination at inappropriate place.

Table 4.5.60: Showing active Children

Table 4.5.61: Showing frequency of fights

Table 4.5.62: Showing thumb sucking as an indicator of emotional problem.

Table 4.5.63: Showing nail biting as an indicator of emotional problem of Children.
Table-4.5.64: Showing temper tantrum as an indicator of emotional problem.

Table-4.5.65: Showing extreme shyness as an indicator of emotional problem.

Table-4.5.66: Showing participation of children in classroom learning.

Table-4.5.67: Showing participation of Children in group activities

Table-4.5.68: Showing Children sharing toys and Tiffin

Table-4.5.69: Showing Children greet Teachers on entering the class

Table-4.5.70: Showing Teachers replied to Children’s greetings

Table-4.5.71: Showing Teachers called Children by their individual names.

Table-4 5.72: Showing the classroom environment.

Table-4.5.73: Showing Children’s friendliness with one another.

Table-4.5.74: Showing Children respecting the possessions and Rights of others.

Table-4.5.75: Showing children talking politely

Table-4.5.76: Showing Children standing in queue

Table-4.5.77: Showing Children greet Teachers and friends

Table-4.5.78: Showing Children say “sorry “for the mistakes they had done.

Table-4 5.79: Showing Children say “Thank you” to others to show gratitude.

Table-4.5 80: Showing Children say “Excuse me”

Table-4.5.81: Showing Children say “Please” when asking for something.

Table-4.5.82: Showing Children Bed-wetting.

Table-4.5.83: Showing the Child stops Bed-Wetting after Pre-School experience.
Table-4.5.84: Showing Children cry on the first few days of attending Pre-School / Anganwadi Centres.

Table-4.5.85: Showing the Child continues crying in the following months.

Table-4.5.86: Showing whether the Child is extremely shy.

Table-4.5.87: Showing Pre-School experience has helped in overcoming extreme shyness.

Table-4.5.88: Showing the Child is close with his siblings.

Table-4.5.89: Showing Pre-school experience has helped in bringing the Child and his siblings closer.

Table-4.5.90: Showing the Child is very demanding of Parent’s attention.

Table-4.5.91: Showing the Child’s demand for parental attention is more before or after Pre-School experience.

Table-4.5.92: Showing the Child frequently throws temper tantrums.

Table-4.5.93: Showing Pre-School experience has helped the Child in reducing temper tantrums.

Table-4.5.94: Showing the Child mixes easily with a group of people.

Table-4.5.95: Showing Pre-School experience has helped the Child in mixing with a group of people.

Table-4.5.96: Showing the Child is happier after having Pre-School experience.

Table-4.5.97: Showing the Child is more agreeable after having Pre-School experience.

Table-4.5.98: Showing the Child cries less after having Pre-School experience.

Table-4.5.99: Showing the Child becomes more affectionate after having Pre-School experience.
Table-4.5.100: Showing the Child becomes more expressive.

Table-4.5.101: Showing the Child follows the instructions of parents more after having Pre-school experience.

Table-4.5.102: Showing the Child friendlier with everyone after attending Pre-School.

Table-4.5.103: Showing Pre-School Children improvement in social manner.

Table-4.5.104: Showing the Children communicate more to the family after attending Pre-school.

Table-4.5.105: Showing the Child’s play preference after attending Pre-School.

Table-4.5.106: Showing Children socialise more after attending Pre-school.

Table-4.5.107: Showing Children more co-operative after attending Pre-School.

Table-4.5.108: Showing the Child shares more toys and snacks after attending Pre-school.

Table-4.5.109: Showing leadership quality after attending Pre-School.

Table-4.5.110: Showing Pre-school Children more respectful of other’s rights and properties.
