ACKNOWLEDGEMENT

The success of every work is due to blessings of God, Gurus and Parents. Every success which is a result of hard efforts never tastes that good if each and every person who participated in it is not acknowledged. First and foremost, I would like to express my gratitude and acknowledgement to Prof. (Dr.) Pawan Kumar Sapra, Principal, College of Engineering & Management Kapurthala, Punjab, India, my thesis supervisor for giving me the opportunity of doing research under him. His enthusiasm on the problem and encouragement throughout the course of this work is very much appreciable. He has always been available for discussion and guided me to accomplish the objective of this study. He has been an inspiring and driving force during the course of this work. Without his timely help, intellectual input, constructive criticism and painstaking efforts, it would not have been possible for me to complete this thesis in the present form. He has guided me from the start and took great interest up to its completion. He helped me to use all resources which were necessary for the completion of my thesis work. Without his direction and help this research couldn’t have completed. So I am very thankful for his support and motivation to reach at the other end of my Ph.D course.

I would like to thank Dr Harpreet Singh, Professor, Indian Institute of Technology, Ropar, Punjab, India, teacher of my B.Tech, M.Tech course and Doctorate course, for giving me full support in my research work, without which it seemed difficult to reach at the other end of the course. I am very thankful to him for giving permission to use all resources which were necessary to conduct my research work and helping me at every stage of my research work for timely direction and motivation.

I am thankful to the authorities of National Fertilizer Limited, Naya Nangal, Punjab, India for giving me the permission to do research study on the boilers in functioning at Steam Generation Plant.

I would like to thank Mr. Nirmal Singh Lab Technician of workshop at IET Bhaddal for helping me to prepare steel specimen. I am very thankful to Ms. Narinder Kaur and Mr. Amit Kaushal, IIT Ropar for helping me in doing XRD, SEM
and EDS work. I would like to thanks Mr. Gurvinder Pal Singh Sodhi and Mr. Rachit Sharma research scholar at IIT Ropar for helping me in my research work.

I am thankful to Prof. Suriender Singh, HOD Mechanical Engineering Department, GZSPTU Campus Bathinda for giving me permission to utilize experimental facilities to do research work at Bathinda campus. I am thankful to Mr. SS Khela Lab Technician for giving me full help and support to do research work at GZSPTU Campus Bathinda.

This gives me a great opportunity to express my gratitude and reverence to my parents Sh. Parmeshi Dass and Smt. Bimla Devi, in the heaven for their blessings, who built my strength to take the challenge of Ph.D course.

The contribution and support of family members cannot be overlooked. I would like to thank my wife Samita Rani my son Ashish and daughter Archana for giving me support to do this research work. I would like to thank my Brothers and Sisters for the moral support.

At this Moment, I record my deepest regards and reverence to God, Gurus and Parents for their blessings.

ADORSH KUMAR
