ACKNOWLEDGEMENT

"Research starts with seeing what everyone else has seen, continues with thinking what no one else has thought and completes with an avowal such that someone will delve into.”

This thesis is outcome of thinking of two brains through my two eyes. It gives me immense pleasure to express my salutations to the two master minds which are in the cranium of intellectual i.e. Dr. U.K.Choudhury AGM-BHEL (R&D) and Dr. G.TulasiRamDas Professor & Registrar JNTUH. Eyes are both windows and beacons for the mind. My salutations to the beacons of my life – my parents. Smt. & Sri Vidwan Gotluru Subbalakshmi Rama Chandra Rao, for whom this thesis is dedicated.

My whole hearted thanks and blessings to all my UG & PG Students in general, Mr. Kamesh and Mr. Sujesh in particular for their relentless assistance all through. I am grateful to all my colonial friends who have been reminding me about this research work frequently.

This is incomplete if I fail to mention the energy to carry out this mega task, who shared more than half of my responsibilities during this work- my better half Smt. Neerajakshi and boost of my life- my kids trio Master Sreekara, Sreeharsha and Sreevatsa for their endurance in tolerating my long silence.

Finally, I thank them- who don’t want their names to be revealed but whose contribution to this task speaks volumes.
