Acknowledgement

Foremost, I would like to give thanks to the Almighty Lord who has guided me through the good and bad times. For without His Grace, this thesis would not have materialized.

Any accomplishment requires the effort of many people and this thesis is no exception. I am particularly grateful to my Supervisor, Prof. S.B. Prasad for his insightful comments, suggestions and constructive remarks. His guidance and persistence has been imperative in shaping this thesis. His vast repertoire of knowledge and wisdom kept me from straying during the course of this research work.

It would have been difficult to complete my work successfully without the permission of the Heads of Department to conduct my experiments in the department. Therefore, I owe a very important debt to the Head of Department, Zoology Prof. N. Saha and the former HODs, Prof. S.B. Prasad, Prof. R.N.K. Hooroo and (L) Prof. B. Kharbuli.

My heartfelt appreciation to the staffs of SAIF, NEHU and NEDC, Shillong, for their assistance in my work.

The teaching and non teaching staffs of Zoology Department for their warm encouragement and assistance, Thank you! My labmates- Mary, Thengtom, Bijoy, Suravi, Esther, Anamika, and especially Rosangkima and Akalesh for their constant support and meticulous discussions. Also my friends and fellow research scholars in the university who have been an enormous help to me. My deep appreciation to my dearest friend Jolene and Brandon for their cooperation and help extended to me always.

A family is an enduring support system. Indeed I am blessed with one. I am indebted to my family members, Mom for being my pillar of strength, Sis. Moa, Atu and bro. Tia for their unceasing love and relentless support, my husband (Batskhem) who always stands by me in every walk of life, and Baby Delicia for being my bundle of joy and pride. Without them this thesis would have come to a standstill.

Lastly, I wish to thank all my wellwishers, for lending a hand whenever I needed them. God bless you all.

Dated: (Amenla)
