LIST OF FIGURES

Fig.4.1 Pre-test achievement scores of control and experimental group.

Fig.4.2 Post-test achievement scores of control and experimental group.

Fig.4.3 Pre and post-test achievement scores of control group.

Fig.4.4 The overall performance of the pre and post-test achievement scores of the students in experimental group.

Fig.4.5 The overall performance of the pre and post-test achievement scores of male and female students in control group.

Fig.4.6 The overall performance of the pre and post-test achievement scores of male and female students in experimental group.

Fig.4.7 The overall performance of the pre and post-test achievement scores of students in control group.

Fig.4.8 The overall performance of the pre and post-test achievement scores of male and female students in the experimental group with regard to locality.

Fig.4.9 The overall performance of the pre and post-test achievement scores of students in control group with regard to different types of school in control group.

Fig.4.10 The pre-test vs post-test achievement scores of students in Experimental groups with regard to different types of school in control group.

Fig.4.11 Pre and post-test scores of control group students who studied different subjects at +2 levels.

Fig.4.12 Pre-test vs post-test scores of experimental group students who studied different subjects at +2 levels.

Fig.4.13 The overall performance of the pre and post-test achievement scores of control group with regard to the different categories of parents' education.
Fig.4.14 The overall performance of the pre and post-test achievement scores of students in experimental group with regard to the different categories of parents’ education.

Fig.4.15 Comparison of post-test achievement scores of male and female students in the control group in different types of writing.

Fig.4.16 Comparison of post-test achievement scores of male and female students in the experimental group in different types of writing.

Fig.4.17 Comparison of post-test achievement scores of rural and urban students in the control group in different types of writing.

Fig.4.18 Comparison of post-test achievement scores of male and female students in the experimental group in different types of writing.

Fig.4.19 Comparison of pre and post-test achievement scores of rural students in the control group in different types of writing.

Fig.4.20 Comparison of pre and post-test achievement scores of urban students in the control group in different types of writing.

Fig.4.21 Comparison of pre and post-test achievement scores of rural students in the experimental group in different types of writing.

Fig.4.22 Comparison of pre and post-test achievement scores of urban students of experimental group in different types of writing.

Fig.4.23 Comparison of post-test achievement scores of control group students belonging to government and aided schools in different types of writing.

Fig.4.24 Comparison of post-test achievement scores of government and unaided school of control group in different types of writing.

Fig.4.25 Comparison of post-test achievement scores of control group students belonging to aided and unaided schools in different types of writing.

Fig.4.26 Comparison of post-test achievement scores of experimental group students belonging to government and aided school in different types of writing.
Fig. 4.27 Comparison of post-test achievement scores of experimental group students belonging to government and unaided schools in different types of writing.

Fig. 4.28 Comparison of post-test achievement scores of experimental group students belonging to aided and unaided schools in different types of writing.

Fig. 4.29 Comparison of post-test achievement scores of students who studied in Arts and Science streams in the control group in different types of writing.

Fig. 4.30 Comparison of post-test achievement scores of students who studied in Arts and Vocational streams in the control group in different types of writing.

Fig. 4.31 Comparison of post-test achievement scores of students who studied in Science and Vocational streams in the control group in different types of writing.

Fig. 4.32 Comparison of post-test achievement scores of students who studied in Arts and Science streams in the experimental group in different types of writing.

Fig. 4.33 Comparison of post-test achievement scores of students who studied in Arts and Vocational streams in the experimental group in different types of writing.

Fig. 4.34 Comparison of post-test achievement scores of students who studied in Science and Vocational streams in the experimental group in different types of writing.

Fig. 4.35 Comparison of pre and post-test achievement scores of students in the experimental whose parents’ education is below X standard in different kinds of writing.

Fig. 4.36 The pre-test and post-test achievement scores of students in the control group whose parents’ education is between X and XII standard.

Fig. 4.37 Comparison of pre and post-test achievement scores of students in the control group whose parents’ education is above XII standard in different kinds of writing.
Fig. 4.38 Comparison of pre and post-test achievement scores of students in the experimental group whose parents’ education is below X standard.

Fig. 4.39 Comparison of pre and post-test achievement scores of students in the experimental group whose parents’ education is between X and XII.

Fig. 4.40 Comparison of pre and post-test achievement scores of students in the experimental group whose parents’ education is above XII.
