ACKNOWLEDGEMENTS

I express my deep sense of gratitude and indebtedness to Dr. P. Govindarajulu, M.Sc., Ph.D., F.R.E.S., Head, Division of Endocrinology, Post-Graduate Institute of Basic Medical Sciences, University of Madras, for suggesting the problem, unfailing guidance and criticism, without which it would not have been possible for me to successfully complete the present investigations. His constant encouragement during the entire period of research was of invaluable help in planning the research programmes.

My grateful thanks are due to Dr. A. Venugopal, M.S., F.I.C.S., F.A.C.S., F.A.M.S., Hon. Director, Post-Graduate Institute of Basic Medical Sciences, for his keen interest and encouragement throughout the studies. I am very much grateful to Dr. B.K. Bachawat, M.Sc., Ph.D., F.R.I.C., F.A.Sc., Director, Institute of Experimental Medicine, Calcutta for his valuable suggestions and criticism during the course of these studies.

I record my deep sense of appreciation and gratitude to Mr. M.K. Balasubramanian, Dr. Miss G. Vanithakumari, Lecturer in Endocrinology, and all my colleagues for their kind and generous help in preparing this thesis. Technical assistance by Mr. M. Sethuram, Division of Endocrinology is gratefully acknowledged.
My thanks are due to Mr. Sreenivasan, B.Sc., Chief Technician, and Mr. P. Raghavendran, Senior Photographer, University Botany Laboratory, for their help in scanning the polyacrylamide gels and photographic expertise, respectively.

I gratefully acknowledge the receipt of University Grants Commission junior research fellowship, during the tenure of which the research work was carried out.
