**List of Abbreviation**                             i  
**Abstract**                                      i-vi  

## Chapter 1

**Introduction**                               1-30  
1.1 Nanoscience                                  1  
1.2 II VI Semiconductor nanomaterials            2  
1.3 Quantum confinement                          3  
1.4 Application of II VI semiconductor nanomaterials  7  
1.5 Synthesis of nanomaterials                   7  
   1.5.1 Radiolytic synthesis                    8  
   1.5.2 A case system: CdSe                     10  
1.6 Radiation Chemistry                         12  
   1.6.1 Radiation chemistry of water          12  
   1.6.2 Absorbed dose and radiation chemical yield  14  
   1.6.3 Radical and molecular yield           15  
   1.6.4 Properties of primary radicals         16  
   1.6.5 Generation of secondary radicals       18  
   1.6.6 Oxidizing conditions                   18  
   1.6.7 Reducing conditions                    19  
1.7 Photophysics of Molecules *vis a vis* Semiconductor Nanomaterials  20  
1.8 Organization of Thesis                       23  
**References**                                   26

Chapter 4

Investigation of dynamics of radiolytic formation CdSe nanoparticles in aqueous solutions

4.1 Introduction
4.2 Experimental details
  4.2.1 Chemicals
  4.2.2 Pulse radiolysis
  4.2.3 Characterization
4.3 Results and discussion
  4.3.1 Pulse radiolysis studies of cadmium precursor
  4.3.2 Pulse radiolysis studies of selenium precursor
  4.3.3 Pulse radiolysis studies of both cadmium and selenium precursor
  4.3.4 Characterization of nanoparticles
4.4 Conclusion

References
Chapter 5

Radiolytic synthesis of CdSe nanoparticles in aqueous solutions: Effect of capping agent  94-114

5.1 Introduction  94

5.2 Experimental  96
   5.2.1 Synthesis  96
   5.2.2 Irradiation condition  96
   5.2.3 Characterization  97

5.3 Results and discussion  97
   5.3.1 Uncapped CdSe quantum dot  97
   5.3.2 Citric acid capped CdSe quantum dot  103

5.4 Conclusion  111

References  112

Chapter 6

Synthesis of CdSe nanoparticles in microemulsions  115-145

6.1 Introduction  115

6.2 Experimental  118
   6.2.1 Radiolytic synthesis  118
   6.2.2 Chemical synthesis  118
   6.2.3 Characterization  119

6.3 Results and discussion  119
   A) CdSe nanomaterial by electron beam irradiation  119
6.3.1 Optical absorption 119
6.3.2 Tuning of shape with different w₀ values 127
6.3.3 Photoluminescence studies 129

B) CdSe nanomaterial through chemical synthesis 138

6.4 Conclusion 141
