Acknowledgement

It gives me a great delight at the juncture of this achievement where getting a PhD degree has been one of the most cherished dreams of my life. This thesis work would not have been possible without the support and inspiration of many people.

At the outset, I wish to express my deep and sincere gratitude to my research Guide, Prof. (Dr.) S. K. Sarkar, Director, Chemistry Group, Bhabha Atomic Research Centre, Mumbai, for his invaluable guidance. His vast knowledge and logical thinking on critical scientific problems have been of great values for me.

This thesis would not have been possible without the guidance, help, support, critical analysis and valuable suggestions from my mentor, Dr. M.C.Rath who has been truly invaluable to me both on an academic and a personal level, for which I am extremely grateful. I am also thankful to him for sharing his excellent knowledge and scientific understanding with me. His enthusiasm, easily amicable, deep engagement in research and critical analysis strategy of experimental data has made a deep impression on me.

I gratefully acknowledge my Co-Guide Dr. Geeta K. Sharma, Department of Chemistry, University of Pune, Pune, for her help and support whenever and wherever required throughout this research period.

My cordial appreciation goes to my lab member, Mr. Apurav Guleria, for his valuable assistance during experiments, assorted help and carrying that zeal for new scientific work, I wish to express my thanks to Dr. S. Adhikari and Dr. Ajay K. Singh for their diversified help. My deepest thanks are to the LINAC group members, Shri S. A. Nadkarni, Shri S. J. Shinde, Mrs. Madhu Toley and Shri B. B. Chaudhari for their constant help during the research work.

My sincere thanks are to Prof. (Dr.) D. D. Dhavale, Head, Department of Chemistry, University of Pune, Pune, who has helped me in all the administrative work, and supported my research work. I would also like to thank Prof. (Dr.) B. S. M. Rao, Co-coordinator of this research programme, for his help rendered in many official
processes. I would also like to thank Dr. A. S. Khumbhar, Mr. Nilesh Dumbre, Department of Chemistry, University of Pune, Pune, for providing me the facilities at NCFRR, whenever required during my research work. I am indebted to the Department of Atomic Energy for the award of a doctoral fellowship.

I would like to sincerely thank Dr. D. K. Palit, Head, Radiation & Photochemistry Division and Dr. T. Mukherjee, ex-Director, Chemistry Group, BARC, for their support and help during the work. Thanks to the office staff members of the Radiation & Photochemistry Division, BARC and the Department of Chemistry, University of Pune, Pune, for their help in official matters.

Life would have been enormously difficult and droning without the amusing and refreshing company of my friends Shashi, Snehal, Chandralekha, Sushant, Shubhendra, Arun, Ahmed, Jerina, Krishna, Ajay, Suvarna, Ajit, Sachin, Yogesh, Charu, Mhezabeen, Prabhat, Vishwabharti, Pradyna.

Finally, I owe my heartfelt gratitude to my family for their indefatigable love and support throughout my life; this dissertation is simply impossible without them. I am indebted to my father who has always encouraged me to follow my heart. I have no word that can fully describe my mom and her everlasting love and support. My brother Ankit’s light hearted chats always served as a booster of rejuvenation.

Thanks to almighty for his grace and blessings to help me achieve of what I am today.

...Shalini
