LIST OF TABLES

Table 1.1: Selected human chemical carcinogens
Table 1.2: Useful chemotherapeutic agents and their mechanism of actions
Table 1.3: Chemopreventive agents using in cancer and their mechanism of action
Table 3.1: Comparison of free radical scavenging activity of lutein with other antioxidants
Table 3.2: Effect of lutein on phorbol 12-myristate 13-acetate (PMA) induced super oxide radical generation in peritoneal macrophages
Table 3.3: Effect of lutein on antioxidant enzymes and glutathione in the blood
Table 3.4: Effect of lutein on antioxidant enzymes and glutathione in the liver tissue
Table 4.1: Antimutagenic activity of lutein on mutagenicity induced by sodium azide in S. typhimurium strains TA 100, TA 102 and TA 1535
Table 4.2: Antimutagenic activity of lutein on mutagenicity induced by NPDA in S. typhimurium strains TA 98 and TA 100
Table 4.3: Antimutagenic activity of lutein on mutagenicity induced by N-methyl- N’-nitro-N-nitrosoguanidine in S. typhimurium strains TA 100 and TA 1535
Table 4.4: Antimutagenic activity of lutein on mutagenicity induced by tobacco extract in S. typhimurium strain TA 102
Table 4.5: Antimutagenic activity of lutein on mutagenicity induced by acetamidofluorene in S. typhimurium strains TA 98 and TA 100 in the presence of S9 mix
Table 5.1: Effect of lutein on tumour incidence and liver weight in NDEA induced hepatocellular carcinoma in rats
Table 5.2: Effect of lutein on bilirubin and serum hepatic enzymes in NDEA induced hepatocellular carcinoma.
Table 5.3: Effect of lutein on hepatic enzymes in NDEA induced hepatocellular carcinoma
Table 5.4: Effect of lutein on papilloma bearing mice
Table 5.5: *in vitro* cytotoxicity of lutein to DLA cells
Table 5.6: Cytotoxicity of luteinto L929 cells (*In vitro*) (MTT assay)
Table 5.7: Effect of lutein on the survival rate of DLA induced ascites bearing mice
Table 5.8: Effect of lutein on inhibition of DLA induced tumor volume in Swiss Albino mice
Table 5.9 : Effect of lutein on inhibition of Phase 1 enzymes in vivo.
Table 5.10 : Effect of lutein on activation of Phase 2 enzymes in vivo
Table 6.1 : Effect of lutein on haemoglobin and total WBC count in cisplatin treated mice
Table 6.2 : Effect of lutein on serum urea and creatinine cisplatin induced mice
Table 6.3 : Effect of lutein on kidney antioxidant enzymes in cisplatin induced mice
Table 6.4 : Effect of lutein on total WBC count of cyclophosphamide treated animals
Table 6.5 : Effect of lutein on bone marrow cellularity of cyclophosphamide treated animals
Table 7.1 : Effect of different doses of radiation on total number of white blood cells/mm$^3$
Table 7.2 : Effect of lutein on total WBC count (cells/mm$^3$) of irradiated mice (3 GY)
Table 7.3 : Effect of lutein on haemoglobin level (gm/dl) of irradiated mice (3GY)
Table 7.4 : Effect of lutein on the body weight of irradiated mice (3 GY)
Table 7.5 : Effect of lutein on SOD activity in liver tissue of irradiated mice (3 GY)
Table 7.6 : Effect of lutein on catalase activity in the liver tissue of irradiated mice (3 GY)
Table 7.7 : Effect of lutein on GPx activity in the liver tissue of irradiated mice (3 GY)
Table 7.8 : Effect of lutein on GSH activity in intestinal mucosa of irradiated mice (3 GY)
Table 7.9 : Effect of lutein on SOD activity in small intestinal mucosa of irradiated mice (3 GY)
Table 7.10 : Effect of lutein on catalase activity in small intestinal mucosa of irradiated mice (3 GY)
Table 7.11 : Effect of lutein on GPx activity in small intestinal mucosa of irradiated mice (3 GY)
Table 7.12 : Effect of lutein on GSH levels in intestinal mucosa of irradiated mice (3 GY)
Table 7.13 : Effect of lutein on radiation induced micronuclei formation in mice bone marrow cells
Table 7.14 : Effect of lutein on radiation induced chromosomal aberrations in mice bone marrow cells
Table 7.15 : Effect of lutein on radiation induced DNA strand breaks
Table 8.1 : Effect of lutein on ulcer index in alcohol induced gastric ulcer in rats
Table 8.2: Effect of lutein on gastric mucosal antioxidant enzymes and glutathione in alcohol induced gastric ulcer in rats

Table 8.3: Effect of lutein administration on serum parameters in carbon tetrachloride treated rats

Table 8.4: Effect of lutein administration on serum parameters in ethanol treated rats

Table 8.5: Effect of lutein administration on serum parameters in paracetamol treated rats

Table 8.6: Effect of lutein administration on liver antioxidant enzymes and glutathione in carbon tetrachloride and ethanol treated rats
