Acknowledgement

God is great and mighty to make, without whose will nothing can move in the world. Human efforts achieve success only when God smiles on them. As a human I thought of doing something in the field of my studies related to thrips population on chilli plants and biological methods to control it so that yield loss occurring to the farmers of the chilli field may be checked and at the same time harms caused by the chemicals in the pest management may be saved. Really it was due to God’s grace upon me that I could complete my adventure.

God helps those who help themselves. As a novice researcher, I went to Dr. Virendra Kumar, Associate Professor, Dept. of Zoology and he agreed to guide me in the present research endeavour. Words fail to express the gratitude I owe to him. It was he who showed me the right path in the course of this research work and unreservedly afforded time whenever I needed it. His valuable suggestions and tips to carry on the research work made me reach the present stage of completion of the project.

I am also thankful to other faculty members of the Department of Zoology, D.S. College, Aligarh namely Dr. Anjana Agrawal, Dr. Sheeba, Mr. Vinay Kumar, Ms. Parul Yadav, Dr. Meera Singh, Dr. P.C. Agrawal, Dr. R.K. Agrawal, Dr. R.K. Goel, Dr. T.C. Agrawal and Dr. P.K. Gupta, who gave fruitful suggestions time to time during the progress of the present research work.

My thanks and gratitude to Dr. S.K. Goel, Head, Department of Mathematics, D.S. College, Aligarh are released spontaneously at this juncture as it was he who showed me a simple and effective method of drawing statistical conclusions for the confirmation of the stated problem.
I offer my special thanks to Dr. Mahesh Chandra, Assistant Professor, Dept. of Zoology, P.C. Bagla College, Hathras who has specialities in research programmes and works as the chief editor of several journals. It was under the benefit of his abilities freely extendable to me that the present research thesis got the current shape. He supported me by providing relevant material and technique to bring finishing touch in my thesis.

I shall be failing in my duty if I do not extend my gratitude to Dr. Sarang Savalekar [Ph.D. in Termite Management, Director – Paramount Pest Consultants Pvt. Ltd., Partner – Pest Consultants, President of Pest Management Association (India)] with whom I had frequent on-line consultations about the progress of my research thesis. His constant support, encouragement and kind faith in me always boosted me and kept me focus towards the goal. It was the help of this gentleman with a big heart that I could achieve high standard in the preparation of my thesis. Dr. Sarang Savalekar is working in Termite Management and has high aptitude for research.

I am highly thankful to Dr. Vivek Kumar, University of Florida, who provided me a number of relevant taxonomic images of thrips which I used for the beautification of my thesis. I am also thankful to Dr. Antoon Loomans, Netherlands who helped me in taxonomical identification and examination of morphological biology of natural enemies selected for our research.

I must extend my gratitude to the journals ‘Bionotes’, ‘Nature and Environment’, ‘Annals of Zoology’ and ‘Annals of Natural Sciences’ which gave space to my research papers during the progress of the present research work.

My thanks go to different libraries, like Maulana Azad Library, A.M.U., D.S. College Library, Aligarh, The British Council Library, Google Online Library and Wiley Online Library wherefrom I picked up material relevant to
my research. I am also thankful to different websites freely available for visiting and downloading. I owe a great deal to IARI, New Delhi and NBAIR, Bangalore (Agricultural Institutes) which supplied to me natural enemies of thrips for getting practical results of my thesis.

I am also thankful to different farmers of the localities mentioned in the thesis, who gave permission to hold experiments in their fields. I am also thankful to Mr. Ravi Mittal who with his extraordinary computer skills made the ugly looking manuscript of the thesis into a beautiful volume as it looks now.

The last, but not the least, the support of my family should not go unnoticed and uncared for. I am highly grateful to my father Dr. Hem Prakash, Head, Dept. of English, D.S. College, Aligarh and my mother Smt. Abha Varshney who helped me financially, morally and emotionally during the progress of the research work. My younger brother Er. Akash and my younger sister Ms. Shreya Varshney also deserve my thanks as they with all naughty activities teased me time to time and again ignited my interest for the research work in ironic comments.

(Manika Gupta)
