ACKNOWLEDGEMENT

It is a matter of great pride and privilege for me to record my sincere thanks and deep sense of gratitude to Dr. C. Ganesa Moorthy, Reader, Department of Mathematics, Alagappa University, Karaikudi for suggesting the topic of this dissertation and for his valuable guidance and encouragement throughout the period of my research despite his varied academic activities. He set apart special hours to offer me the required inspiration and wise council in the preparation of the dissertation. Indeed my debts to him are immeasurable.

I am thankful to Dr. N. Sridharan, Professor and Head, Department of Mathematics, Alagappa University, Karaikudi for his encouragement and providing facilities during the course of my research.

I am grateful to the Secretary and the Principal of Seethalakshmi Achi college for women, Pallathur for granting me permission to avail F.I.P. (U.G.C.1X plan) for one year and three months and then to do part-time research. Also I express my gratitude for their encouragement throughout my research career.

I wish to express my thanks to the Librarians, Ramanujam Institute of Mathematics, University of Madras and to the Institute of Mathematical Sciences for their co-operation to enable me to collect valuable particulars pertaining to the subject matter from the literature treasured by them.
I am indebted to all the faculty members of the Department of Mathematics Alagappa University, Karaikudi for their good deeds and co-operation they have rendered to me.

I express my thanks to my colleagues and especially to the staff members of the Department of Mathematics in my college for their kind help and co-operation.

Finally I would like to express my special thanks to Bharath Computers for the neat execution in type setting.
