Abstract                      xiii

CHAPTER I – INTRODUCTION
1.1. Brief Statement of the Problem  1
1.2. Relevance of the Problem    2
1.3. The Hypothesis             4
1.4. Major Objectives          5
1.5. Algal Community in Soil   6
    1.5.1. Ecological Significance of Soil-Algae  9
    1.5.2. Economic Significance of Algae        12
    1.5.3. Significance of Algae in Soil formation 14
    1.5.4. Soil-Algae in Relation to Vegetation  15
    1.5.5. Algae in Relation to Physico-Chemical Soil
      Environmental Factors                   16
    1.5.6. Taxonomic Characterization of Soil-Algae  18
    1.5.7. Significance of In Vitro Algal Cultivation  19
1.6. Novelty in the Current Soil-Algal Study  19
1.7. Major Achievements       21

CHAPTER II - REVIEW OF LITERATURE
2.1. Introduction              22
2.2. Historical Review of Soil-Algal Research  23
2.3. Algae in Indian and Other Tropical Soils  32
2.4. In Vitro Culture of Soil-Algae    34
2.5. Correlation of Soil-Algal Community to Soil Factors  
2.6. Soil-Algae in Relation to Seasons  
2.7. Soil-Algae in Relation to Types of Vegetation  
2.8. Application of Soil-Algal Studies  
2.9. Soil-Algal Characterizations  
2.10. Green-Algae (Chlorophyceae) in Soil  
2.11. Blue-Green Algae (Cyanophyceae) in Soil  
2.12. Diatoms (Bacillariophyceae) in Soil  
2.13. Conclusion  

CHAPTER III - MATERIALS AND METHODS  
3.1 Area of Investigation  
3.2. Field Survey for Algae and Soil Samples  
3.3. In Vitro Culture Studies  
3.4. Analysis of Physico-Chemical Soil Parameters  
3.5. Biodiversity Characterization  
3.6. SEM Analysis of Field Soil  
3.7. Environment Relationships and Population Dynamics of Algae  
3.8. Statistical Methods  

CHAPTER IV - RESULTS  
4.1. Introduction  
4.2 Rainfall  
4.3. Physico-Chemical Characteristics of the Soil  
  4.3.1. Soil Temperature  
  4.3.2. Soil Moisture  
  4.3.3. Soil pH  
  4.3.4. Electrical Conductivity  
  4.3.5. Total Nitrogen in Soils  
  4.3.6. Organic Carbon in Soils  
  4.3.7. Plant Available Phosphorus in Soils  
  4.3.8. Plant Available Potassium in Soils  
4.4. Field Observations of Soils from Three Different Kinds of Vegetation  
  4.4.1. Direct Field Observations of Algal Community in Soils  
  4.4.2. Observations of Soil Crusts using SEM
4.5. Biodiversity of Soil-Algae in Relation to Three Kinds of Vegetation and Seasons in *Oxic Dysrustepts* of the Western Ghats at Pathanamthitta District

4.5.1. Diversity of Green-Algal Community in the Soil

4.5.1.1. Division Chlorophyta

4.5.1.1.1. Class Chlorophyceae

4.5.1.1.1.1. Order Volvocales

4.5.1.1.1.2. Order Chlorococcales

4.5.1.1.1.3. Order Sphaeropleales

4.5.1.1.1.4. Order Ulotrichales

4.5.1.1.1.5. Order Microsporales

4.5.1.1.2. Class Trebouxiophyceae

4.5.1.1.2.1. Order Chlorellales

4.5.1.1.2.2. Order Oocystales

4.5.1.1.2.3. Order Prasiolales

4.5.1.2. Division Charophyta

4.5.1.2.1. Class Klebsormidiophyceae

4.5.1.2.2. Class Zygnematophyceae

4.5.1.2.2.1. Family Mesotaeniaceae

4.5.1.2.2.2. Family Peniaceae

4.5.1.2.2.3. Family Closteriaceae

4.5.1.2.2.4. Family Desmidiaceae

4.5.1.2.2.5. Family Zygnemataceae

4.6. Ecological Characteristics of Green-Algal Community

4.6.1. Relative Abundance in the Field

4.6.2. Species Diversity Index

4.6.3. Species Richness

4.6.4. Species Evenness

4.6.5. Environmental Correlations

4.7. Diversity of Blue Green-Algal Community in the Soil

4.7.1. Order Nostocales

4.7.1.1. Family Nostocaceae

4.7.1.2. Family Michrochaetaceae

CHAPTER V - DISCUSSION

5.1. Introduction 134

5.2. Physico-Chemical Characteristics of the *Oxic Dystrustepts* 137
   5.2.1. Soil Temperature 137
   5.2.2. Soil Moisture 138
   5.2.3. Soil pH 140
   5.2.4. Total Nitrogen 141
   5.2.5. Soil Organic Carbon 143
   5.2.6. Plant Available P 147
   5.2.7. Plant Available K 148

5.3. Diversity and Ecology of Green-Algae in the *Oxic Dystrustepts* 149

5.4. Diversity and Ecology of Blue Green-Algae of the *Oxic Dystrustepts* 157

5.5. Diversity and Ecology of Diatoms of the *Oxic Dystrustepts* 165

5.6. Total Diversity of Algal Community in Relation to Vegetation and Seasons 170

CHAPTER VI - GENERAL CONCLUSION 173
