List of Figures

2.1 Simulated sample path of the DAR(1) process with Quasi Negative Binomial II as marginal for \( p_1 = 0.021; p_2 = 0.00513; n = 100 \) (a) \( \beta = 1 \) (b) \( \beta = 0.9 \) (c) \( \beta = 0.8 \) (d) \( \beta = 0.6 \) (e) \( \beta = 0.4 \) (f) \( \beta = 0.2 \) .................................................. 36

2.2 Complementary distribution function of the stationary system size in DAR(1)/D/s with quasi negative binomial as marginal when (a) \( p_1 = 0.0045, p_2 = 0.0082, \lambda = 2.5 \) (b) \( \lambda = 2.5, \beta = 0.3 \) .................................................. 48

2.3 Complementary distribution function of the waiting time of an arbitrary packet in DAR(1)/D/s with quasi negative binomial as marginal, when (a) \( p_1 = 0.009, p_2 = 0.0064 \) (b) \( \beta = 0.3 \) .................................................. 48

2.4 Customer checkout data as DAR(1) .................................................. 51

2.5 The Probability histogram of customer checkout data and DAR(1) with marginal Quasi Negative Binomial II distribution with \( \hat{p}_1 = 0.021 \) and \( \hat{p}_2 = 0.00513 \) ............... 52

3.1 Simulated sample path of the DAR(1) process with discrete skew Laplace as marginal distribution for \( p = 0.665, q = 0.335, n = 100 \) (a) \( \beta = 1 \) (b) \( \beta = 0.9 \) (c) \( \beta = 0.7 \) (d) \( \beta = 0.5 \) (e) \( \beta = 0.3 \) (f) \( \beta = 0.1 \) .................................................. 64
3.2 Complementary distribution function of the stationary system size in DAR(1)/D/s with DSL(p, q) as marginal when (a) $\lambda = 1.8, q = 0.1$ and $s = 2$ (b) $\lambda = 1.8, \beta = 0.1$ and $s = 2$. 77

3.3 Complementary distribution function of the waiting time of an arbitrary packet in DAR(1)/D/s with DSL(p, q) as marginal for (a) different $\beta$, $\lambda = 1.8, q = 0.1$ and $s = 2$ (b) different $q$, $\lambda = 1.8, \beta = 0.1$ and $s = 2$. 77

3.4 Real data with positive and negative arrivals as DAR(1). 80

3.5 The Probability histogram of real data and the DAR(1) with marginal as discrete skew Laplace distribution with $\hat{p} = 0.675$ and $\hat{q} = 0.335$. 80

4.1 Simulated sample path of the DAR(1) process with discrete stable as marginal for $\lambda = 2.5, \gamma = 1, n = 100$ (a) $\beta = 0.9$ (b) $\beta = 0.5$ (c) $\beta = 0.6$ (d) $\beta = 0.4$ (e) $\beta = 0.2$ (f) $\beta = 0.1$. 96

4.2 Simulated sample path of the DAR(1) process with Sibuya as marginal for $n = 100$ (a) $\beta = 0.5$ and $\gamma = 0.3$ (b) $\beta = 0.5$ and $\gamma = 0.95$ (c) $\beta = 0.9$ and $\gamma = 0.95$ (d) $\beta = 0.9$ and $\gamma = 0.3$ (e) $\beta = 0.1$ and $\gamma = 0.95$ (f) $\beta = 0.1$ and $\gamma = 0.3$. 97

4.3 Complementary distribution function of the stationary system size in DAR(1)/D/s with discrete stable as marginal when (a) $\gamma = 1, \lambda = 2.7$ (b) $\gamma = 1, \beta = 0.7$. 102

4.4 Complementary distribution function of the waiting time of an arbitrary packet in DAR(1)/D/s with discrete stable as marginal, when (a) $\gamma = 1$ and $\lambda = 2.7$ (b) $\gamma = 1$ and $\beta = 0.7$. 102

4.5 Real data. 104

4.6 The Probability histogram of real data and DAR(1) with Poisson as marginal with $\lambda = 2.5267$. 105

5.1 Simulated sample path of the DAR(1) process with discrete Mittag-Leffler ($\alpha = 1$) as marginal distribution for $n = 100$ (a) $\beta = 1$ (b) $\beta = 0.9$ (c) $\beta = 0.7$ (d) $\beta = 0.5$ (e) $\beta = 0.3$ (f) $\beta = 0.1$. 115
5.2 Complementary distribution function of the stationary system size in DAR(1)/D/s with discrete Mittag-Leffler as marginal when (a) $\alpha = 1, \lambda = 2.7$ (b) $\alpha = 1, \beta = 0.5$  120
5.3 Complementary distribution function of the waiting time of an arbitrary packet in DAR(1)/D/s with discrete Mittag-Leffler as marginal, when (a) $\alpha = 1$ and $\lambda = 2.7$ (b) $\alpha = 1$ and $\beta = 0.5$  120
5.4 Real data  123
5.5 The Probability histogram of Real data and DAR(1) with marginal Discrete Mittag-Leffler ($\alpha = 1$) distribution with $\hat{p} = 0.1756$ and $\hat{q} = 0.8244$ and $\beta = 0.8$  123

6.1 Graph of $E_\alpha(z)$ for various values of $\alpha$  130
6.2 Hazard rate of Mittag-Leffler distribution when (a) $\alpha=0.2$ (b) $\alpha=0.9$  131
6.3 Simulated sample path of the Mittag-Leffler count process for (a) $\alpha = 0.9$ (b) $\alpha = 0.7$ (c) $\alpha = 0.5$ (d) $\alpha = 0.1$  136
6.4 Probability histogram of Mittag-Leffler count model ($\alpha=0.5$) and Poisson model ($\lambda=2$)  139
6.5 The histogram of the real data and the frequency curve of the Mittag-Leffler distribution  141
6.6 Probability histogram of the predicted number of customers arriving in a bank according to Mittag-Leffler count model and Poisson model  142

7.1 Hazard rate of Type II Gumbel distribution for different values of $a$ and $b = 0.7152$  152
7.2 Probability histogram of Type II Gumbel count model ($a = -1.5$) and Poisson model ($\lambda = 2$) displaying underdispersion  156
7.3 Probability histogram of Type II Gumbel count model ($a = -0.5$) and Poisson model ($\lambda = 2$) displaying overdispersion  157
7.4 Relationship between rainfall and the spread of Chickungunya between 2005 and 2007 in Kerala  159
7.5 Relationship between temperature and the spread of Chikungunya between 2005 and 2007 in Kerala  160
7.6 Histogram of the real data and the frequency curve of Type II Gumbel distribution \((a = -1.5 \text{ and } b = 0.445)\) ................................................. 161

7.7 Probability histogram of the expected number of months having extreme rainfall in Kerala during 2005-2008 according to Gumbel count model and Poisson model ...................................................... 162

7.8 Histogram of real data and the frequency curve of Type II Gumbel distribution \((a = -0.93 \text{ and } b = 0.595)\) ...................................................... 163

7.9 Probability histogram of the expected number of days having maximum temperature in Kerala during 2005-2008 according to Gumbel count model and Poisson model ...................................................... 163
