ACKNOWLEDGEMENTS

Besides the sense of gratitude for the blessings and benevolence from the Almighty God, I am really indebted to a lot of people who have helped me in different ways in the pursuit of my research.

The most prominent among them is Dr. Sunil C. Mathew, my Guide and Research Supervisor, who enlightened, corrected and guided me in every step through discussions and suggestions, enabling me to stand on my own legs to pursue my study even beyond the realm of a doctoral degree. Let me fold my hands in reverence and gratitude before his paternal care and love.

I would also like to thank the Management and the Staff of St. Thomas College Palai, for providing me the facility and support to pursue my research.

My sincere thanks are also due to the Management, Principal and the Members of the Staff of Amal Jyothi College of Engineering Koovappally, for their never ending co-operation and help during this work.

I remember with utmost respect and gratitude Dr. Joy Jacob, Principal, Deva Matha College, Kuravilangad for the language correction of this Thesis.

The blessings and the inspiration showered on me by my beloved parents, Mr. M. J. Thomas and Mrs. Susan Thomas, were truly an impetus for the completion of this Thesis.

The loving and incessant encouragement and prayers of my wife, Julie, deserve to be specially mentioned. Without her, this Thesis would never have been a reality.

I place on record my thanks and indebtedness to all those who have helped me in many ways in this endeavour.

Ullas Thomas
