5.4 RESULTS AND DISCUSSION

5.4.1 Effect of current density
5.4.1.1 Effect on current efficiency
5.4.1.2 Effect on cerium(III) ion and cerium(IV) ion
5.4.1.3 Effect on cell voltage

5.4.2 Effect of Temperature
5.4.2.1 Effect on current efficiency
5.4.2.2 Effect on current density
5.4.2.3 Effect on cerium(III)
5.4.2.4 Effect on cerium(IV)
5.4.2.5 Effect on cell voltage

5.4.3 Effect of cerium(III) methanesulphonate concentration
5.4.3.1 Effect on cerium(III)
5.4.3.2 Effect on cerium(IV)

5.4.4 Effect of Methanesulphonic acid concentration
5.4.4.1 Effect on cerium(III)
5.4.4.2 Effect on cerium(IV)

5.5 KINETIC STUDY ON ELECTROCHEMICAL PREPARATION OF CERIUM(IV) METHANESULPHONATE

5.6 CONCLUSIONS
REFERENCES

CHAPTER 6

PROCESS OPTIMIZATION – FACTORIAL DESIGN OF EXPERIMENTS FOR MEDIATED ELECTROXIDATION SYSTEM

3.1 INTRODUCTION
3.2 EXPERIMENTAL
3.3 RESULTS AND DISCUSSION
3.3.1 Factorial design of experiment
3.4 CONCLUSIONS
REFERENCES
CHAPTER 7
ELECTROCHEMICAL CELL DESIGN AND DEVELOPMENT FOR MEDIATED ELECTROCHEMICAL OXIDATION - CERIUM(IV)/(III) SYSTEM

7 1 INTRODUCTION

7 2 MEDIATED ELECTROCHEMICAL OXIDATION

7 3 ADVANTAGES OF REDOX SYSTEM IN ELECTROORGANIC SYNTHESIS

7 4 DESIGN AND DEVELOPMENT OF ELECTROCHEMICAL CELLS FOR Ce(III)/Ce(IV) SYSTEM

7 5 EXPERIMENTAL

7 5 1 Divided Electrochemical cells for the generation of Cerium(IV)methanesulphonate

7 5 1 1 Batch cell

7 5 1 2 Batch cell with re-circulation

7 5 1 3 Flow cell - Electro MP cell

7 5 2 Undivided Electrochemical cell for the generation of Cerium(IV)methanesulphonate

7 6 RESULTS AND DISCUSSION

7 6 1 Electrochemical preparation of Cerium(IV)methanesulphonate

7 6 1 1 Amount of Cerium(IV)methanesulphonate generated

7 6 1 2 Current Efficiency

7 6 1 3 Yield

7 6 1 4 Space Time Yield

7 6 1 5 Energy consumption

7 6 2 Studies on divided Electrochemical cells for the generation of Cerium(IV) methanesulphonate

7 6 2 1 Batch cell

7 6 2 2 Batch cell with re-circulation

7 6 2 3 Flow cell - Electro MP cell

7 6 3 Undivided Electrochemical cell for the generation of Cerium(IV) methanesulphonate

7 6 3 1 Study on effect of differential cathode area on current efficiency in undivided cell
CHAPTER 8

OPTIMIZATION ON MEDIATED SYNTHESIS OF AROMATIC QUINONES USING CERIUM(IV) METHANESULPHONATE

8.1 INTRODUCTION .................................................. 148
8.2 Mediated electrochemical oxidation .................................... 149
8.3 Mediated electrochemical synthesis of quinones ..................... 150
  8.3.1. Synthesis of 1,4-naphthoquinone ................................ 150
  8.3.2. Synthesis of 2-methyl 1,4-naphthoquinone ...................... 152
  8.3.3 Synthesis of 5-nitro-1,4-naphthoquinone .................... 154
8.4 EXPERIMENTAL
  8.4.1. Mediated electrochemical synthesis of 1,4-naphthoquinone... 155
  8.4.2. Mediated electrochemical synthesis of 2-methyl-1,4-naphthoquinone 156
  8.4.3. Mediated electrochemical synthesis of 5-nitro-1,4-naphthoquinone 156
  8.4.4. Analysis and characterisation .................................. 156
8.5 RESULT AND DISCUSSION
  8.5.1 Studies on mediated electrochemical synthesis of 1,4-naphthoquinone .................................................. 157
  8.5.2 Studies on mediated electrochemical synthesis of 2-methyl-1,4-naphthoquinone
    8.5.2.1. Effect of methanesulphonic acid concentration .......... 162
    8.5.2.2. Effect of substrate concentration .......................... 165
    8.5.2.3 Effect of temperature ....................................... 166
    8.5.2.4 Recycling of anolyte ....................................... 168
8.5.3 Studies on mediated electrochemical synthesis of 5-nitro 1,4-naphthoquinone

8.5.3.1. Effect of temperature ........................................ 170
8.5.3.2. Effect of substrate concentration ...................... 173
8.5.3.3. Effect of methanesulphonic acid concentration ...... 175

8.6 CONCLUSIONS ......................................................... 177
REFERENCES ..................................................................... 178

CHAPTER – 9

OPTIMIZATION ON MEDIATED SYNTHESIS OF AROMATIC ALDEHYDES USING CERIUM(IV)METHANESULPHONATE

9.1 INTRODUCTION .............................................................. 181
9.2 Mediated electrochemical synthesis .................................. 181
9.3 Mediated electrochemical synthesis of aldehydes .......... 184
9.4 EXPERIMENTAL
   9.4.1. Mediated electrochemical synthesis of Benzaldehyde,
          p-chlorobenzaldehyde and o-chlorobenzaldehyde ........ 188
9.4.2 Analysis and characterisation ..................................... 189
9.5 RESULT AND DISCUSSION
   9.5.1 Studies on mediated synthesis of benzaldehyde ....... 190
      9.5.1.1. Effect of temperature .................................. 191
      9.5.1.2. Effect of agitation ...................................... 191
   9.5.2 Studies on mediated synthesis of p-chlorobenzaldehyde.. 195
      9.5.2.1. Effect of temperature .................................. 196
      9.5.2.2. Effect of agitation ...................................... 196
   9.5.3 Studies on mediated synthesis of o-chlorobenzaldehyde... 200
      9.5.3.1. Effect of temperature .................................. 200
      9.5.3.2. Effect of agitation ...................................... 201

9.6 CONCLUSIONS .......................................................... 205
REFERENCES ..................................................................... 206
CHAPTER 10

MEDIATED ELECTROOXIDATION PROCESS FOR THE PRODUCTION OF 1,4-NAPHTHOQUINONE & BENZALDEHYDE

10.1 INTRODUCTION ................................................................. 208
10.2 MEDIATED ELECTROOXIDATION PROCESS ......................... 208
10.3 EXPERIMENTAL
  10.3.1. Electrochemical oxidation ........................................... 211
  10.3.2. Chemical oxidation of naphthalene .............................. 211
  10.3.3. Chemical oxidation of toluene .................................. 211
  10.3.4. Product analysis and characterisation .......................... 213
10.4 RESULTS AND DISCUSSION
  10.4.1. Mediated electrooxidation process for cerium(IV) methanesulphonate ........................................... 214
    10.4.1.1 Effect of current density .................................... 214
    10.4.1.2 Effect of temperature ....................................... 215
    10.4.1.3 Effect of electrolyte flow rate .............................. 216
  10.5 Studies on chemical oxidation of naphthalene .................... 218
  10.6 Studies on chemical oxidation of toluene .......................... 221
  10.7 CONCLUSIONS ............................................................... 224
  REFERENCES ...................................................................... 225

CHAPTER 11

CONCLUSIONS AND SCOPE OF THE FUTURE WORK .................... 226
