Sincere thanks first of all goes to the Almighty God for making this thesis a success. My sincere gratitude goes to my supervisor, Dr. Bipan Hazarika, Associate Professor, Department of Mathematics, Rajiv Gandhi University, Rono Hills, Doimukh, Arunachal Pradesh for his patience, support and assistance on this project. Without his certain amount of guidance, directions and support, I would have not progressed my research work.

I would like to thank the Vice-Chancellor, the Registrars and office employees of Rajiv Gandhi University, Rono Hills, Doimukh.

I wish to express my deep sense of gratitude to the respected faculty members of Mathematics department, namely, Prof. Sahin Ahmed, Head of the department, Dr. Utpal Jyoti Das, Dr. Sunil Kumar Singh, Dr. Nipen Saikia, Dr. Saifur Rahman and Mr. Anupam Das for their kind support, help and encouragement during the entire study. Special thanks and gratitude are also extended to all the employees, research scholars and student friends of the Mathematics department, Rajiv Gandhi University for impacting in me by various means.

Many thanks to my parents and all other family members for their immense support in my educational career.

Finally, I am most grateful to Professor Michel Grossman for his pioneering creation of Non-Newtonian Calculus, valuable suggestions and inspiring comments towards my work at every moment, even in his illness. May God bless him!

KHIROD BORUAH
