ACKNOWLEDGEMENT

There are lots of people I would like to thank for a huge variety of reasons.

My present status in life, this Ph.D. included, is a result of the extraordinary
will, efforts, encouragement and motivation of my parents and my wife.

Firstly, I would like to thank my Supervisor, Prof. P. Ramamurthy, FNASc.
Director, NCUTP. I could not have imagined having a better advisor and mentor for
my Ph.D. with his approach to new dimensions in the field of chemical sciences and
keen sense of purpose and seemingly boundless frontiers of knowledge set about
charting the course of this investigation. He has provided guidance, inspiration and
direction to this work with many seminars and individual discussions which has
provided me to present the thesis. He gave me enormous freedom to pursue my own
interests while at the same time providing just the right amount of guidance to ensure
that my efforts contribute to the mainstream of chemical research. His all-around
expertise helped me through many problems and his opinions helped shape this work.

I would like to thank Prof. P. Natarajan, FNA, FASc., former Director -
(SMCRI, founder Director - NCUTP, presently DST-Ramanna Fellow and Sesqui
Centennial Emeritus Professor, University of Madras for his help and motivation. He
has been so encouraging and given me his time so generously and expertise for which I
will always be grateful.

It gives me great pleasure to thank Dr. E.J. Padmamalar, Reader, UG(C
Research Scientist NCUTP, for teaching me the fundamentals of Quantum Mechanics
and providing me the ideas, significance and the importance of the theoretical studies
based on my experimental part. I would like to thank Prof. V. I. Ramakrishnan, UG(C
Emeritus Professor, NCUTP for his valuable help, discussions and moral support
during the course of my study.

It gives me great pleasure to thank Dr. C. Selvam, Lecturer, NCUTP for his
support throughout my Ph.D. programme. I am grateful to him for sharing with me his
deep knowledge on instrumentation which motivated me in developing part of the measurement methods presented in the thesis. Further he voluntarily involved with me in discussions which provided constant encouragement throughout my studies.

Special thanks to Dr. P. Kalaiselvi, Department of Biochemistry, PG, I.A.M.S, University of Madras, Taramani Campus for serving on my doctoral committee and contributing valuable insights to my thesis work.

Several teachers of chemistry have influenced me profoundly at pivotal moments in my early education. I wish to thank Prof. S. Santhanam and Prof. D. P. Sankaran, of Loyola College, for giving me good foundation in the subject.

I take great pleasure in thanking Prof. A. K. Mishra, Dept. of Chemistry, Indian Institute of Technology, Madras for fluorescent spectral measurements for my samples. I wish to thank Dr. A. Jayakumar, Scientist (LR) for CD spectral measurements. I also wish to thank Prof. P. Rajakumar, Head of the Dept. Organic Chemistry, University of Madras for NMR studies.

I wish to express my whole hearted thanks to Dr. S. Sriman Narayanan, and Dr. V. Durai, for their valuable suggestions and encouragement. I also express my pleasure in thanking Dr. M. Sekharan and Dr. S. Amirthagowri for their moral support and encouragement. I wish to express my whole hearted thanks to Dr. Sumathi Balakrishnan and Dr. Jaya Visweswaran for their valuable help in writing, and shaping my thesis.

I take great pleasure in thanking Dr. S. Ilangovan, Head, Dept. of Chemistry, and all other faculty members, non-teaching staffs of the Dept. of Chemistry, D.G. Vaishnav College, Chennai for their moral support, encouragement and help.

In my lab at NCUFP, I was surrounded by knowledgeable and friendly people who helped me daily. My seniors Dr. H. Prakash, Dr. C. Raja, Dr. Easwaramoorthy, Dr. V. Thilagarajan, Dr. Mrs. Indhrapriyadarshini, and Mr. R. Lakshmanan have been a great source of practical information. what I have carried out I am indebted to my research colleagues at NCUFP from past and present, who have taught me, learned with me and shared their effort in shaping my work. Dr. K. Ananthanarayanan, Ms. I. Sadhika Banu, Ms. T. Shanmuga Priya, Mr. P. DharmaRanjan, Mr. R. Velu,
Mrs. Krishnaveni, Mr. N. Deena, Mr. P.Ashokkumar, Mr. K. Senthil Kumar, Mr. K.Durai Murugan, Ms. R. Koteswari, Mr. R.Ashok Kumar and Ms. D.Yohalakshmi. I wish to express my wholehearted thanks to Dr. S.Suresh Babu, Dr. Raj Kannan and Dr. S.G.Srivatsan for providing me the basic knowledge in molecular modeling and providing materials regarding biomolecules. I also extend my heartfelt thanks to Mr. P.Selvaraj, Section Officer, PG18MS, Taramani Campus, Mr. T.Kumar, Mr. Selva Mani, Mr. P.Mohan Babu (Deceased) Office staffs, NCU for their help.

In addition to the people in NCUFP, I am lucky enough to have the support of many good friends starting my from school days to my (abot Sanmar colleagues and many well wishers. In this aspect I would like to thank Mr. M.Suresh, Scientist, ISRO Tiruvanathapuram, Dr. R. James Mannekutla, Dr. Sarfrarz Shaik and Mr. K. Thangaraju, for providing me the reprints and articles at critical times. My sincere thanks Ms. O.Divya, Ms. P. Anita Kumar, and Ms. Suchitra, IIT Madras, their valuable timely help at every instant. My acknowledgement to Mrs. S. Bindhu, Adyar Students Xerox Pvt. Ltd., Adyar, for presenting thesis in the proper alignment.

I have the pleasure of acknowledging those who have provided me with the personal foundation which has been so indispensable to my professional life. First and foremost, I thank my parents, my wife and my in laws for providing the support at every instance. Without entertainment and fun in my research carrier, it would not been possible to complete my work without my daughter Rithika.

I would like to record my sincere thanks to UGC for their financial assistance, which has enlightened the task of this tenure.
