Acknowledgement

The thesis is the outcome of almost six years of my journey in the field of biophysical approach to study DNA-Nanoparticles interaction. There are lots of people supported me throughout the course of my research work and I would like to express my profound thank to all for a huge variety of reasons on the verge of completion. Foremost, I would like to express my heartfelt respect and truthful gratitude to my mentor Prof. Tarakdas Basu, of the Department of Biochemistry and Biophysics, University of Kalyani, who introduced me to join nano-science. His scholarly way of supervision, especially full phase of liberty to understand the problem and to design experiments to tackle tough questions is an invaluable learning for me. Throughout the whole period of my work, he provides me a shelter do research independently i.e., how to think a problem, how to intend experiment, how to interpret the outcomes, how to write manuscripts and all. I think it is quite tough to express his guidance as well as constructive and meaningful suggestions in a single message, but it will remain memorable excellent journey to me throughout my life.

My due respect also goes to Prof. Ashoke Prasun Chattopadhyay, Department of Chemistry, University of Kalyani, for his unparalled help and advice throughout my PhD program.

I would like to express my sincere gratitude to Dr. Rakhi Dasgupta for this unconditional constant support to me. I would also like to thank all the rest of the academic and support staff of the Department of Biochemistry & Biophysics, University of Kalyani.

I also like to express my gratitude to Prof. Sukhen Das, Department of Physics, Jadavpur University and Prof. Samir Kumar Mukhopadhyay, Dept. of Micro Biology, University of Kalyani, for their unparalleled help.

I would also like to thank SINP, Bose Institute, SNBNCBS, IACS, Jadavpur University, University of Calcutta, IIT Kharagpur for their instrumental support, whenever I required.

I must have to mention the immense help and assistance from my lab-mates, which made the avenue of my roaming about the PhD problem a smooth one. I would like to record my sincerest thank to Rajesh Pradhan, Department of Chemistry and Santu Saha, Department of Zoology, University of Kalyani, for their constant help in biological studies and fruitful discussion in this matter. However, because the list might be too long and by fear of leaving someone out, I will simply say thank you very much to you all.

A special thanks goes to DST & DBT, Govt of India for their financial assistance.
I am obviously indebted and would like to pay high regards to my parents and family members for providing mental support and sincere encouragement during the tenure of my research work. They have always supported and encouraged me to do my best in all matters of life.

Date: 
Place: 
Department of Biochemistry & Biophysics.
University of Kalyani, Kalyani 741235.
