</table>
Table 4.15  Cross-tabulation between use of multimedia material and learners’ motivation towards using new media technology...........97
Table 4.16  Cross-tabulation between use of multimedia study materials and learners’ status of employment / working status.................................................................98
Table 4.17  Cross-tabulation between use of e-Jnan Taranga and nature of location.................................................................98
Table 4.18  Cross-tabulation between use of e-Jnan Taranga and gender .................................................................101
Table 4.19  Cross-tabulation between use of e-Jnan Taranga and age-groups of learners..................................................102
Table 4.20  Cross-tabulation between Use of e-Jnan Taranga and level of education.................................................................103
Table 4.21  Cross-tabulation between Use of e-Jnan Taranga and learners’ preference for distance mode of education.............104
Table 4.22  Cross-tabulation between use of e-Jnan Taranga and learners’ motivation towards use of new media technologies......106
Table 4.23  Cross-tabulation between use of e-Jnan Taranga and Status of income.................................................................107
Table 4.25  : Cross-tabulation between use of audio-video learning materials and nature of location.................................109
Table 4.26  Cross-tabulation between use of audio-video learning materials and gender.................................................................110
Table 4.27  Cross-tabulation between use of audio-video learning materials and age groups..................................................111
Table 4.28  Cross-tabulation between use of audio-video learning materials and level of education.............................................113
Table 4.29  Cross-tabulation between use of audio-video learning materials and reason for opting distance education...............114
Table 4.30  Cross-tabulation between use of audio-video learning materials and learners’ enjoyment in using new media technology .................................................................115
Table 4.31  Cross-tabulation between employment/working status and the use of audio-video learning materials......................117
Table 4.32  Distribution of respondents according to use of E-bidya (e-portal of KKHSOU) ........................................... 118
Table 4.33  Cross-tabulation between use of e-bidya and nature of location ................................................................. 119
Table 4.34  Cross-tabulation between gender and use of E-bidya (e-portal of KKHSOU) ......................................................... 120
Table 4.35  Cross-tabulation between use of E-bidya and age groups ................................................................. 121
Table 4.36  Cross-tabulation between use of e-bidya and reason for opting for ODL ......................................................... 122
Table 4.37  Cross-tabulation between the use of e-bidya and learners’ enjoyment in using new media technologies ............... 124
Table 4.38  Cross-tabulation between use of e-bidya and learners’ employment status ....................................................... 125
Table 4.39  Distribution of respondents according to use of the online study materials ......................................................... 126
Table 4.40  Cross-tabulation between use of the online study materials and nature of location ............................................. 127
Table 4.41  Cross-tabulation between use of online study materials and gender ................................................................. 128
Table 4.42  Cross-tabulation between use of the online study materials and age groups ....................................................... 129
Table 4.43  Cross-tabulation between online study materials and level of education .......................................................... 130
Table 4.44  Cross-tabulation between online study materials and mode of education .......................................................... 132
Table 4.45  Cross-tabulation between use of the online study materials and learners’ motivation towards using new media technologies .......................................................... 133
Table 4.46  Cross-tabulation between the use of the online study materials and employment status ........................................ 135
Table 4.47  Distribution of respondents according to use of the ‘digital library’ .............................................................. 136
Table 4.48  Cross-tabulation between use of the ‘digital library’ and nature of location ......................................................... 137
Table 4.49  Cross-tabulation between use of ‘digital library’
and gender ..................................................................................138
Table 4.50  Cross-tabulation between the use of ‘digital library’
service of KKHSOU and age-groups............................................140
Table 4.51  Cross-tabulation between use of digital library
and level of education..................................................................141
Table 4.52  Cross-tabulation between use of ‘digital library’
service of KKHSOU and learners’ preference for
distance education.......................................................................142
Table 4.53  Cross-tabulation between use of the ‘digital library’
and learners’ motivation towards using new media
technologies..................................................................................144
Table 4.54  Cross-tabulation between employment status and
the use of the ‘digital library’......................................................... 145
Table 4.55  Distribution of respondents according to use of the
assignment from the website ..........................................................146
Table 4.56  Cross-tabulation between use of assignments from
website and nature of location.......................................................147
Table 4.57  Cross-tabulation between use of assignments from
website and gender.......................................................................148
Table 4.58  Cross-tabulation between use of assignments from
website and age-group .................................................................150
Table 4.59  Cross-tabulation between use of assignments from
website and level of education......................................................151
Table 4.60  Cross-tabulation between use of assignments from
website and learners’ preference for distance
mode of education..........................................................................152
Table 4.61  Cross-tabulation between use of assignments from
website and learners’ motivation towards using
new media technologies................................................................153
Table 4.62  Cross-tabulation between use of assignments from
website and employment/working status....................................155
Table 4.63  Cross-tabulation between use of smart KKHSOU
android app and nature of location ..............................................156
| Table 4.64 | Cross-tabulation between use of smart KKHSOU app and gender | 157 |
| Table 4.65 | Cross-tabulation between use of smart KKHSOU android application and age groups | 159 |
| Table 4.66 | Cross-tabulation between the use KKHSOU android application and level of education | 160 |
| Table 4.67 | Crosstab between Use of smart KKHSOU android application and learners’ preference of distance mode of education | 162 |
| Table 4.68 | Cross-tabulation between the use of smart KKHSOU android application and learners’ motivation towards using new media technologies | 163 |
| Table 4.69 | Cross-tabulation between the use of the android application smart KKHSOU and employment status | 164 |
| Table 4.70 | Distribution of respondents according to use of Facebook group of KKHSOU | 166 |
| Table 4.71 | Cross-tabulation between use of social networking (Facebook group) of KKHSOU and nature of location | 167 |
| Table 4.71 | Cross-tabulation between use of social networking site (Facebook) and gender | 168 |
| Table 4.72 | Cross-tabulation between use of the social networking of KKHSOU and age- groups | 169 |
| Table 4.73 | Cross-tabulation between the use of social networking and learners’ level of education | 171 |
| Table 4.74 | Cross-tabulation between use of the Facebook group of KKHSOU and learners’ preference for distance mode of education | 172 |
| Table 4.75 | Cross-tabulation between use of social networking and learners’ motivation towards using new media technologies | 173 |
| Table 4.76 | Cross-tabulation between use of social networking of KKHSOU and employment status | 175 |
| Table 4.77 | Distribution of respondents according to use of KKHSOU job portal | 176 |
Table 4.78  Crosstab between nature of location and the use of job portal

Table 4.79  Cross-tabulation between Use of KKHSOU job portal and gender

Table 4.80  Cross-tabulation between use of job portal and age group

Table 4.81  Cross-tabulation between use of job portal and level of education

Table 4.82  Cross-tabulation between use of job portal and learners’ preference for distance mode of education

Table 4.83  Cross-tabulation between use of KKHSOU job portal and learners’ motivation towards using new media technologies

Table 4.84  Cross-tabulation between use of job portal and employment

Table 4.85  Learners’ response on satisfaction with the support provided by new media technology of the university

Table 4.86  Learners’ response on help from new media technologies in clarifying misunderstanding or doubt related to study

Table 4.87  Learners’ response on help/support from study centre staff (coordinator and counselor) in using the new media technologies

Table 4.88  Learners’ response on new media technology providing additional information on the course

Table 4.89  Learners’ response on new media technology’s role as a supplement to the print study materials

Table 4.90  Learners’ response on new media technology’s role in improving learning ability

Table 5.1  KMO and Bartlett’s Test
