ACKNOWLEDGEMENT

With great pleasure and respect I record my deep sense of gratitude and indebtedness to my research guide, Dr. K.V. Mohanan, Reader (Genetics and Plant Breeding) and Course Coordinator (Plantation Development), Department of Botany, University of Calicut, Kerala, India for suggesting the topic and for valuable guidance during the study.

I am thankful to Prof. (Dr.) N. Neelakandan, former Head of the Department of Botany and Prof. (Dr.) S. Nandakumar, Head of the Department of Botany, University of Calicut, for permitting me to carry out the research programme.

I am indebted to Dr. N. Muraleedharan, Director and Dr. R.V.J. Ilango, Senior Botanist, UPASI Tea Research Foundation, Valparai, Tamil Nadu, India for permitting me to do the field work and phytochemical analysis in the tea research institute of the foundation.

It is Mr. B. Gnanagurusamy, my younger brother, who brought my dreams true. The support he raised not only to complete this doctoral degree but also in all my activities is unimaginable. Besides, he holds the responsibilities of our family in lieu of me. Without him I could not have achieved this. Let my forthcoming generations remember his name for his wholehearted support.

Whenever I need a sympathetic ear, I used to call a person; it is Mr. B. Umasaravanan, my youngest brother who played a crucial role in my doctoral studies. Whatever I would like to do, he was the first person to encourage my ideas. I am very proud of being the eldest of these two.
There is a girl in my life, next to my mother, who has joined our family in the later part of this study and going to come till the end of my life; it is Renuga, my wife. The help she and her parents Mr. Subramanian and Ms. Saraswathy rendered at the time of thesis compilation is gratefully acknowledged here.

It was one person's constant effort that made me to think of science. It is Mr. V.A. Gladson. If I had not met him, I would have been nowhere in the field of science.

I salute the help rendered by my friends, Sasikumar, Murugashen, Pandi, Jeyaram, Venkatesh, Joshi and Karthikeyan. They proved the fact "friend in need is a friend indeed".

I extend my sincere thanks to Ms. Unamaheswari R, Research Fellow, Genetics and Plant Breeding Division, Department of Botany, University of Calicut for helping in the statistical analysis and also for proof reading.

Finally, I would like to say that it is all because of my paternal grandmother Unnamali's blessings. Let it continue in future.

B.Ramasubramanian
