ACKNOWLEDGEMENTS

The author wishes to express his deep indebtedness to Dr. P. Varalakshmi, M.Sc., Ph.D., Lecturer in Biochemistry, Department of Biochemistry, Postgraduate Institute of Basic Medical Sciences, University of Madras, Tharamani Campus, for suggesting the problem and giving valuable suggestions for the progress of the work.

He also likes to place on record his deep sense of gratitude to Co-Guide Prof. Dr. (Mrs.) K. Radha Shamugasundaram, M.Sc., Ph.D., M.Sc. (Sheffield), A.R.I.C. (Lond.), A.C.S. (Lond.), Head of the Department of Biochemistry, Postgraduate Institute of Basic Medical Sciences, University of Madras, Tharamani Campus, who had been a source of strength and inspiration throughout the onerous investigations.

A special sense of gratitude is felt by the author towards his Professor Dr. E.B.B. Shamugasundaram, M.A., B.Sc., Ph.D., F.R.I.C. (London), F.C.S. (London), Senior Professor of Biochemistry, University Biochemical Laboratory, University of Madras, Guindy Campus, who had never stinted in the gift of various chemicals at crucial times. Thanks to the guidance and co-operation of these pedagogues, the author's work was lightened to a very great extent and could be finished on time.
