CHAPTER 7
FUTURE SCOPE
7. FUTURE SCOPE

PDTDB is currently under constant development on data curation and tool development. A feature plan of PDTDB is to implement the following features.

1. Graphical network visualization of target-ligand interaction network
2. Automatic prediction of pharmacokinetic properties
3. Multi-ligand docking and comparison
4. Complete the phytochemical entries in the plant database
5. Increase the size of target and docking entries in the database
6. Multi device responsive web layout design
7. Integration of PDTDB with external databases/servers
8. Implement similarity ensemble approach
9. Android/iOS application development
10. Quick preview of entries in the database
