

ACKNOWLEDGEMENT

First of all I am grateful to the Almighty God for establishing me to complete this work and blessing me throughout as his devotee and giving me strength to complete this journey.

All praises are due to **Prof. Rupinder Tewari**, my "Guru" for his cordial support, guidance and path lightening approach towards all the aspects of life whether personal or professional that proved to be a bliss in completing this task. I take this opportunity to address him as a fatherly figure for his continuous blessing, help and guidance right from my master's day that has contributed to personal development on forefront. I would like to thank him for constant cooperation, all time availability, encouragement, valuable advice time to time which resulted in building a motivational environment throughout my Ph.D. There are so many moments passed that would be cherished lifelong. I bow him for the efforts he has taken for helping in wherever I needed. Apart from his guidance on this research work, I learned a whole lot of things from him, which I feel are even more important than learning science. I always regard him for being an eminent mentor who always takes care of your problems and by simply saying beta ji make your problems vanish. Thanks a lot Sir for everything you have given me.

I take this opportunity to express a deep sense of gratitude to **Prof. Praveen Rishi**, who has always given blessing, strength and knowledge in carrying out work. I really appreciate you for the care and support you have provided me and the way you motivated me by your one single phone call. It means a lot for me. I really appreciate her for all time inspiration and support. Her young and dynamic spirit promoted me to work harder and find myself short of words to eloquent my gratitude to her in guiding me, summing up my flaws and endowing with insight in my tough times.

I highly appreciate the support of faculty members of Department of Microbial Biotechnology Dr Rohit Sharma, Dr Rachna, Dr Samer and Dr

Indresh. I would also like to express my sincere thanks to Dr Vishal Agrawal for his cooperation and all time ready help in carrying out cell line work and making me learn a lot.

I take this opportunity to sincerely thank Dr Arvind Gulati, senior scientist and Mrs Shashi Bisht, Institute of Himalayan Bioresource Technology, Palampur for identifying bacterial isolates.

I am also thankful to Dr Naresh Sachdeva, Department of Endocrinology, PGIMER for providing me excellent environment to carry out my research work under his guidance. I would like to thank Mrs Vandana, Mrs Neeru, Mr Darshan Badal and Mr Mohinder for helping me out with experimentation work.

I would like to express the deepest thanks to Dr R.K. Malik for guiding me in starting with my research work by sharing the deeper insights of the subject. I would also like to thank Dr Pradip Sen, Dr Mamta and Mr Ravi for tutoring me skills to handle cell lines. I owe my gratitude to all of them for their kind support to make me enable to get hands on to latest techniques and instrument.

I would like to thank all my seniors and lab mates Dr Gurdeep kaur, Dr Mansimran, Dr Navkiran, Dr Vishal, Sumanpreet, Arun, Amita, Avantika, Meenu, Pervinder, Gaganpreet, Gaurvee, Om Parkash, Jyoti, Madhu, Anu and Anjana, who are just not lab mates but a close bunch of precious friends to me. Big thanks to all of you for making such a wonderful friendly environment of the lab.

Just want to say once again that **RT LAB ROCKS!!!!!!!**

Apart from lab I would like to thank my closest friend Sumeha who has always been a big support in my life, sharing all my ups and downs and getting along with a beautiful smile in journey of our friendship.

I would also like to thank my best friend Tushar Bakshi my biggest support in all my tough times. I will like to pay sincere thanks to you who has always nurtured me like your little sister and helped me a lot to

complete this journey which would have been really tough without your support Tush.

Thanks are due to office staff Mr Nitin, Mr Kanhiya, Mr Bharat, Ms Sandhaya and other members of Department of Microbial Biotechnology and Microbiology Department.

I would also at this point like to thank Bhavya Sondhi and my would be in-laws to encourage me to complete this journey by comforting me in the bestest possible manner.

Long journey of Ph. D. would not have been possible without the support of my family. A big thanksssss to Mama, Papa, Johny and Bhabhi. They are the strongest pillars of my life providing me with immense support in every phase of my life. What I am now, is just because of their patience, sacrifice, support, selfless efforts and hard work. I don't think I have words that explains how I can acknowledge them. I will be always indebted to their immense love, always there for me whenever I need throughout my thin and thick times and always standing with a positive attitude towards life. Special mention to my darling Paa... who developed ferventness in me to start with this journey and motivating me to drive forward.

I herewith greatly acknowledge and thank DST-INSPIRE for financial support in awarding a Research Fellowship to accomplish this research work.

I dedicate this work to the memory of my late grandfather

“Dr Prem Nath Trikha”

I miss you always.....
