ACKNOWLEDGEMENT

Numerous people have been instrumental in enabling me to give a concrete shape to research work. Constraints of time and space preclude the mention of all of them here. However, I must mention the names of those peoples who have made a catalytic impact on the development of this thesis.

First and foremost, I pay reverence to the omniscient, omnipresent, omnipotent, The God who has perpetually patronized me with the contentiousness and love.

I express my thanks to my guide, Dr. Ketan P. Modi, Associate Professor, B. K. Modi Government Pharmacy College, Rajkot for giving erudite guidance, informative and critical discussions and constant encouragement which have enabled me to take up and complete this study. To work under the guidance of such eminent person has been a great and inexplicable experience, which will go a long way down my memory lane in my life. My hearty thanks go to him.

I wholeheartedly take this opportunity to place on record my profound gratitude to my respected Jijaji, Dr. Anil K Patel, Former Nephrologists, Muljibhai Patel Urological Hospital, Nadiad who is always a source of strength and inspiration to me and sincerely aspired to see me pursue a higher education and serve a society. I also thanks to Dr. Shishir Gang, Dean of Muljibhai Patel Urological Hospital, Nadiad who helped me in every stages of my work.

Words are an inadequate medium to express my deep sense of gratitude. I sincerely feel that all the credits should go to my Father, Dahyabhai J. Patel & my Mother, Vinuben D. Patel for their consistent prayers, affectionate blessings, selfless care and endless confidence in me. I am indebted infinitely to love, care, patience and trust being showered on me by my sister Pinal & my nephew Advait and Aaradhya. I heartily believe that without support of my family, I would have never come to the stage of writing this acknowledgement.
It gives me an immense pleasure to express my deep sense of gratitude to my sweet, loving and caring wife, Rikita, for her keen interest, propelling inspiration and valuable suggestions. She shared valuable ideas with me, kept the environment charged and gave persistent encouragement and motivation throughout investigation.

The successful completion of this project is not an individual effort. It is an outcome of the cumulative efforts of number of persons, each having their own importance to the objective. I special thanks to Peon, Mr. Ramanbhai for his co-operation and support.

I take an opportunity to thank all staff members of Muljibhai Patel Urological Hospital, Nadiad including Dr. Bhupesh, Dr. Prakash for their valuable suggestions, directions and selfless support throughout the investigation.

Last but not least, I owe gratitude and thankfulness Mr. Mahesh Judal, Biostatistician of Torrent Pharmaceuticals who helped me in performance of biostatics portion of my thesis.

I again express my sincere thanks to all the persons who helped and supported me directly or indirectly in the journey of fulfillment of an objective.

Dharmik D. Patel
