ACKNOWLEDGEMENT

I wish to thank senior bankers and IT professionals from numerous Indian banks – particularly the thanks are due to S/shri. A. G. Prabhu (ICICI Bank), Anantha (Karnataka Bank), N. Sen (UTI Bank), Satish Gandhe (Vishveshwar Bank) and V D Kolhatkar (Bank of Maharashtra), who helped me with their valuable suggestions.

I also appreciate enthusiasm of my students from various institutes like IIMs, Symbiosis, Pune University, IGNOU, etc. who kept me young and energetic to accomplish this mission. Credit also goes in substantial part to the participants of my IT security programs at several academic outfits like NIBM, NIA, RBI, ASCI (Hyderabad), etc.

My sincere thanks to over a thousand participants of my IT Security training programs in general and over a hundred respondents of the survey undertaken as a part of this research for their kind cooperation.

I put on record my gratefulness towards Dr. Ashok Joshi, Director, IndSearch and his complete team for the continued support.

I have no words to express my deep gratitude to my guide – Dr. Sharad L. Joshi, Director Vishwakarma Inst. of Management, Pune – for his incessant and inspiring mentorship all through my IT career for over two decades, including this arduous academic accomplishment.
