ACKNOWLEDGEMENT

Not only knowledge but the knowledge with proper way is more valuable. The opportunities to make such directions clear or targeted do not come frequently. Such one of rarest opportunities I got. At this time, I want to thank from bottom of my heart to some individuals who have given me their invaluable guidance and all who aided to make my work successful.

At this amenity of successful accomplishment of my work, I offer my salutation to the Lord Almighty, who blessed me with enough amount of strength to discharge my duties, immaculately.

It is my privilege to express my sincere vote of thanks to my guide Dr. D. K. Thakkar (Professor and Head of Department of Mathematics, Saurashtra University, Rajkot), who always been very cooperative and helped me a lot during this study. He stood by me and gave me definite path, whenever I required, during my research work. Without his constant encouragement and inspiration this work would not have seen the light of the day.

It is indeed a boundless pleasure on my part to express my gratitude to my respected and reverend teacher Dr. S. Ravichandran, for his valuable guidance, keen interest and helpful nature. He imported his most valuable time to guide me in completing my M.Phil. dissertation, which actually turned out to be my first step toward research.

It has been my privilege to express my thanks to Dr. S. Visweswaran, Dr. S. K. Vaidya and Dr. V. J. Kaneria for their invaluable suggestion, direction and support in fulfilling the objective of my research work.

How can I forget my father, Late Bhikhubhai Kothiya, on this occasion. He was one of the prime motivators, along with my mother, Jinnatben Kothiya, for my research fanaticism. Without their blessings this target would not have been accomplished. I bow my head with complete dedication at their feet.

I convey my heartfelt gratitude to my wife, Trupti Kothiya, for not only looking after my son, Ridham Kothiya, but also fulfilling all the social responsibilities single handedly.

Words are inadequate to express my gratitude to my brother, Parvej Kothiya and my sister, Anisha Kothiya, for their inspiration, moral support, sacrifice, devotion, love, blessings and best wishes that made me capable to stand at the point where I am.

I would like thank to my colleagues cum friends, Prof. Bhavesh Kakrecha, Prof. Kirit Kalariya, Prof. Sanket Badiyani, Prof. Varda Dave and other research students of the department of mathematics.

Amin B. Kothiya
